L O N D O N :

Printed for W. NICOLL, N<sup>o</sup>. 51, in St. Paul's  
Church Yard. MDCCLXXII.

[ Price 3s. bound. ]

## ADVERTISEMENT.

**T**HE chief Intention of this Performance is to point out, and explain to the Fair-Sex, the Methods by which they may preserve and add to their Charms; and by which many natural Blemishes and Imperfections may be remedied or concealed. The same Share of Grace and Attractions is not possessed by all of them; but while the Improvement of their Persons is the indispensable Duty of those who have been little favoured by Nature, it should not be neglected even by the few who have received the largest Proportion of her Gifts. The same Art which will communicate to the former the Power of Pleasing, will enable the latter to extend the Empire of their Beauty. It is possible to remove, or, at least, to cover the Defects of the one Class, and to give Force and Lustre to the Perfections of the other.

## ADVERTISEMENT.

The Author, however, though in general he has framed his Work for the Advantage of the Ladies, has not entirely confined it to them. The Virtues of Plants and Vegetables, beside the Service they furnish for the Toilet, have their Use in Articles of Luxury. He has thence been induced to address himself also to the Perfumer: And his Publication, he flatters himself, while it comprizes a very perfect Collection of the Methods which tend to improve Beauty, to repair the Wastes of Languor and Fatigue, and to avert the Marks of Decline and Age, has likewise included satisfactory Accounts of what has a Reference to domestic Œconomy and Expence.

*Most simple and approved Methods of preparing Baths, Essences, Pomatums, Powders, Perfumes, sweet-scented Waters, and Opiates for preserving and whitening the Teeth, &c. &c.*

---

No. 1. *An Aromatic Bath.*

**B**OIL, in a sufficient quantity of river-water, one or more of the following plants; viz. Laurel, Thyme, Rosemary, Wild Thyme, Sweet-Marjoram, Bastard-Marjoram, Lavender, Southernwood, Wormwood, Sage, Pennyroyal, Sweet-Basil, Balm, Wild Mint, Hyssop, Roses, Pinks, Clove-july-flowers, Wall-Flowers,  
B. Stocks,

Stocks, Anise, Fennel, or any other herbs that have an agreeable scent. Having strained off the liquor from the herbs, add thereto a little Brandy, or camphorated Spirits of Wine.

This is an excellent bath to strengthen the limbs; it removes aches and pains proceeding from cold, promotes perspiration, and causes the body to exhale an agreeable odour.

2. *A Cosmetic Bath.*

TAKE two pounds of cleansed Barley, a pound of Rice, three pounds of Lupines, all finely powdered; eight pounds of Bran, and ten handfuls of Borrage and Violet Leaves. Boil these ingredients in a sufficient quantity of spring water. Nothing cleanses and softens the skin like this bath.

3. *An Emollient Bath for the Feet.*

BOIL, in clear water, a pound of Bran, a few Marsh-mallow Roots, two or three  
handfuls

handfuls of Mallow Leaves, an handful or two of Pellitory of the Wall, and as much Bearsfoot.

4. *An Aromatic Bath for the Feet.*

TAKE four handfuls of Pennyroyal, Sage, and Rosemary, three handfuls of Angelica, and four ounces of Juniper Berries; boil these ingredients in a sufficient quantity of water, and strain off the liquor for use.

5. *An excellent Preservative Balsam against the Plague.*

SCRAPE fine twelve Scorzonera and Black Salsifix (or Goatsbread) Roots; simmer them over a gentle fire in three quarts of Lisbon or French White Wine, in a vessel closely covered, to prevent the too great evaporation of the vinous spirit; when the roots are sufficiently boiled, strain off the liquor through a linen strainer

with a gentle pressure : then add thereto the Juice of twelve Lemons, Cloves, Ginger, Cardamom Seeds, and Aloes Wood, grossly powdered, of each half an ounce, and about one ounce of each of the following herbs, viz. fresh Leaves of Rue, Elder, Bramble, and Sage ; boil all together over a gentle fire till one quart is wasted away ; strain the liquor off immediately through a strong linen bag, and keep it in an earthen or glass vessel close stopped. Drink every morning fasting, for nine days together, half a pint of this Balsam, and by this means you will be proof against the malignancy of the Atmosphere, though you even visited infected persons. Those who are already seized with a pestilential or contagious disorder, should add to this Balsam the Juice of a Root of Bugloss and Scabious, beat up with Treacle. Persons who have a carbuncle,

buncle, or plague sore, should bruise Bramble Leaves and Elder Leaves, with some Mustard Seed, and apply a pultice thereof to the carbuncle; which ought to be renewed every night and morning.

6. *An excellent Cosmetic for the Face.*

TAKE a pound of levigated Hartshorn, two pounds of Rice Powder, half a pound of Cerufs, Powder of dried Bones, Frankincense, Gum Mastic and Gum Arabic, of each two ounces. Dissolve the whole in a sufficient quantity of Rose-water, and wash the face with this fluid.

7. *A curious Perfume.*

BOIL, in two quarts of Rose-water, an ounce of Storax, and two ounces of Gum Benjamin; and add, tied up in a piece of gauze or thin muslin, six Cloves bruised, half a drachm of Labdanum, as much Calamus Aromaticus, and a little Lemon-

B 3

peel;

## 6 THE TOILET

peel; cover the vessel up close, and keep the ingredients boiling a great while; strain off the liquor without strong pressure, and let it stand to settle. Keep the Sediment for use in a little box.

### 8. *Perfumed Chaplets and Medals.*

TAKE Marechal Powder, and make into a paste with Mucilage of Gum Tragacanth and Arabic, prepared with All-flower-water (the receipt for which is contained in this book.) If the paste is mixed too thin, add more Marechal Powder; and if too thick, more Mucilage. The mould must be rubbed with a little Essence of Jasmine, or of any other sweet-scented herb, to prevent the Paste from sticking. This Paste in colour resembles coffee.

## OF FLORA.

9. *Receipt to thicken the Hair, and make it grow again on a bald part.*

TAKE Roots of a Maiden Vine, Roots of Hemp, and Cores of soft Cabbages, of each two handfals; dry and burn them; afterwards make a lye with the ashes. Before you wash your head with this lye, the part should be rubbed well with Honey, and this method persisted in for three days together.

10. *An approved Depilatory Fluid.*

TAKE Polypody of the Oak, cut into very small pieces; put them into a glass cucurbit (an oblong vessel); pour thereon as much Lisbon, or French White Wine, as will rise about an inch above the ingredients, and digest in balneo mariæ (or a bath of hot water) for twenty-four hours; then distil off the liquor by the heat of boiling water, till the whole has come

over the helm. A linen cloth wetted with this fluid, may be applied to the forehead, back of the hand, wrists, nostrils, or any other part, and kept thereon all night. This application must be repeated every night till the hair falls off.

The distilled water of the Leaves and Roots of Celandine, applied in the same manner, has the same effect.

11. *A Powder to prevent Baldness.*

POWDER your head with powdered Parsley Seed, three nights every year, and the hair will never fall off.

12. *To quicken the Growth of Hair.*

DIP the teeth of your comb every morning in the expressed Juice of Nettles, and comb the hair the wrong way. It will surprisingly quicken the growth of the hair.

Some,

Some, after having shaved the head, foment it with a decoction of Wormwood, Southernwood, Sage, Betony, Vervain, Marjoram, Myrtle, Roses, Dill, Rosemary, or Mistletoe.

13. *A compound Oil for the same Intention.*

TAKE half a pound of green Southernwood bruised, boil it in a pint and an half of Sweet-Oil and half a pint of Red Wine; when sufficiently boiled, remove it from the fire, and strain off the liquor through a linen bag: repeat this operation three times with fresh Southernwood; the last time add to the strained liquor two ounces of Bears-grease.

This oil quickly makes the hair shoot out.

14. *A Fluid to make the Hair grow.*

TAKE the tops of Hemp as soon as that plant begins to appear above ground, and

B 5

infuse

infuse them four and twenty hours in water. Dip the teeth of the comb in this fluid, and it will certainly quicken the growth of the hair.

15. *A Liniment of the same Kind.*

TAKE six drachms of Labdanum, two ounces of Bears-grease, half an ounce of Honey, three drachms of powdered South-ernwood, a drachm and an half of Ashes of Calamus Aromaticus Roots, three drachms of Balsam of Peru, and a little Oil of Sweet-Almonds. Mix into a liniment.

16. *To change the Colour of the Hair.*

FIRST wash your head with spring-water, then dip your comb in Oil of Tartar, and comb yourself in the Sun: repeat this operation three times a day, and at the end of eight days at most the hair will turn black; if you are desirous  
of

of giving the hair a fine scent, moisten it with Oil of Benjamin.

17. *Simple Means of producing the same Effect.*

THE Leaves of the Wild Vine change the hairs black, and prevent their falling off. Burnt Cork; Roots of the Holm-oak, and Caper-tree; Barks of Willow, Walnut-tree and Pomegranate; Leaves of Artichokes, the Mulberry-tree, Fig-tree, Raspberry-bush; Shells of Beans; Gall and Cypress-nuts; Leaves of Myrtle, green Shells of Walnuts; Ivy-berries, Cockle, and red Beet-seeds, Poppy-flowers, Alum, and most preparations of Lead. These ingredients may be boiled in rain-water, wine or vinegar, with the addition of some cephalic Plant, as Sage, Marjoram, Balm, Betony, Clove July-flowers, Laurel, &c. &c.

18. *To change the Hair or Beard black.*

TAKE Oil of Costus and Myrtle, of each an ounce and an half, mix them well in a leaden mortar ; add liquid Pitch, expressed Juice of Walnut Leaves and Laudanum, of each half an ounce ; Gall-nuts, Black-lead, and Frankincense, of each a drachm ; and a sufficient quantity of Mucilage of Gum-arabic made with a decoction of Gall-nuts.

Rub the head and chin after shaving with this mixture.

19. *A Fluid to die the Hair of a flaxen Colour.*

TAKE a quart of Lye prepared from the Ashes of Vine-twigs ; Briony, Celandine Roots, and Turmeric, of each half an ounce, Saffron and Lilly Roots, of each two drachms ; Flowers of Mullein, Yellow Stechas, Broom, and St. John's-wort,

wort, of each a drachm; boil these ingredients together, and strain off the Liquor clear.

Frequently wash the hair with this fluid, and in a little time it will change to a beautiful flaxen colour.

20. *A perfumed Basket.*

PLACE a layer of perfumed Cotton extremely thin and even on a piece of Taffety stretched in a frame; strow thereon some curious Violet Powder, and then some Cypress Powder; cover the whole with another piece of Taffety: nothing more remains to complete the work, but to quilt it, and cut it of the size of the basket, and trim the edges with ribband.

21. *Natural Cosmetics.*

THE Juice that issues from the Birch-Tree when wounded with an auger in spring  
is

## 14 THE TOILET

is deterfive and excellent to clear the complexion: the fame virtue is attributed to the depurated Juice of this tree, and its diftilled water. Some people recommend Strawberry-water; others the decoction of Orpiment, and fome Frog-spawn-water.

### 22. *A Remedy for Corns on the Feet.*

ROAST a Clove of Garlic on a live coal or in hot afhes; apply it to the corn, and faften it on with a piece of cloth. This Cosmetic (to ufe the expreffion) muft not be made ufe of till the moment of going to bed. It foftens the corn to fuch a degree, that it loofens and wholly removes the core in two or three days, however inveterate; afterwards wafh the foot with warm water, in a little time the indurated fkin that forms the horny tunic of the corn will difappear, and leave the part as clean and fmooth as if it had never been attacked with

with any disorder. It is right to renew this application two or three times in twenty-four hours.

23. *A Coral Stick for the Teeth.*

MAKE a stiff Paste with Tooth Powder and a sufficient quantity of Mucilage of Gum Tragacanth: form with this Paste little cylindrical Rollers, the thickness of a large goose quill, and about three inches in length. Dry them in the shade. The method of using these corals, is to rub them against the teeth, and in proportion as they waste, the teeth get cleaner; they serve instead of Tooth Powders, opiates or prepared roots, but they are brittle, and apt to break, and on this account are less convenient than Tooth Powder that is used with the prepared roots.

24. *A Receipt to clean the Teeth and Gums, and make the Flesh grow close to the Root of the Enamel.*

TAKE an ounce of Myrrh in fine powder, two spoonfuls of the best white Honey, and a little green Sage in fine powder; mix them well together, and rub the teeth and gums with a little of this Balsam every night and morning.

25. *Ditto, to strengthen the Gums and fasten loose Teeth.*

DISSOLVE an ounce of Myrrh as much as possible in half a pint of Red Wine and the same quantity of Oil of Almonds: Wash the mouth with this fluid every morning.

This is also an excellent remedy against worms in the teeth.

26. *Another.*

DISSOLVE a drachm of Cachoe (an Indian perfume) in a quart of Red Wine, and gargle the mouth therewith.

27. *Or rather,*

BRUISE Tobacco Roots in a mortar, dip a linen cloth in the Juice, and rub the teeth or gums with the Juice. You may also put some Tobacco bruised between the fingers into the hollow of the tooth. Or take the green Leaves of a Plumb Tree or Rosemary, and boil them in lees of Wine or Vinegar ; gargle the mouth with the Wine as hot as you can bear it, and repeat it frequently.

28. *For rotten Teeth.*

MAKE a balsam with a sufficient quantity of Honey, two scruples of Myrrh in fine powder, a scruple of Gum Juniper, and ten grains of Roch-Alum. Frequently apply this mixture to the decayed tooth.

29. *A Liquid Remedy for decayed Teeth.*

TAKE a pint of the Juice of the Wild Gourd, a quarter of a pound of Mulberry Bark, Pellitory of Spain and Henbane, of each three ounces; Roch-Alum, Sal-Gem and Borax, of each half an ounce; put these ingredients into a glass body and distill in a sand heat to dryness; take of this liquor and brandy, of each an equal part, heat them and gargle the mouth. It removes all putridity, and cleanses away dead flesh.

30. *A Powder to clean the Teeth.*

TAKE Dragon's-Blood and Cinnamon, of each one ounce and an half, Burnt-Alum, one ounce; beat all together into a very fine powder, and rub a little on the teeth every other day.

31. *A Remedy for sore Gums and loose Teeth.*

BOIL Oak Leaves in spring water, add a few drops of Spirit of Sulphur; and gargle the mouth with a little of this decoction every morning while necessary.

32. *An approved Receipt against that troublesome Complaint, called the Teeth set on Edge.*

PURSLAIN, Sorrel, Sweet or Bitter Almonds, Walnuts, or burnt Bread, will certainly remove this disagreeable sensation.

33. *A Liquid Dentifrice.*

TAKE Lemon Juice, two ounces, Burnt-Alum and Salt, of each six grains; boil them together about a minute in a glazed pipkin, and then strain through a linen cloth. The method of using it is to wrap a bit of clean rag round the end of a stick,

stick, dip it in the Liquid and rub it gently against the teeth. You must be careful not to have too much of the Liquid on the rag, for fear it should excoriate the gums or inside of the mouth. This Dentifrice ought not to be used above once every two or three months.

34. *A sure Preservative from the Tooth Ache, and Defluxions on the Gums or Teeth.*

AFTER having washed your mouth with water as cleanliness and indeed health require, you should every morning rinse the mouth with a tea spoonful of Lavender-Water mixed with an equal quantity of warm or cold water, whichever you like best, to diminish its activity. It is a mistaken notion to imagine that Spirit of Wine alone would produce the same effect, viz. the drain of serosities which it discharges from the gums and salival glands. The Lavender  
is

is beyond doubt of infinite service. This simple and innocent remedy is a certain preservative, the success of which has been confirmed by long experience.

35. *A Method to make the Teeth beautifully white.*

TAKE Gum Tragacanth one ounce, Pumice-stone two drachms, Gum Arabic half an ounce, and Chrystal in very fine powder one ounce; dissolve the Gums in Rose-water, incorporate the powders therewith and form into little sticks, which are to be dried slowly in the shade; when dry, they are fit for use.

36. *Or else,*

TAKE dried Leaves of Hyssop, Wild Thyme and Mint, of each half an ounce; Roch-Alum, prepared Hartshorn, and Salt, of each a drachm; calcine these ingredients together in a pot placed on burning coals; when

## 22 THE TOILET

when sufficiently calcined, add thereto Pepper and Mastic, of each half a drachm; Myrrh a scruple; reduce the whole into a very fine powder, and mix into the consistence of an Opiate with Storax dissolved in Rose-water. Rub the teeth with a small bit of this Opiate every morning, and afterwards wash the mouth with warm Wine.

### 37. Or,

DIP a piece of clean rag in Vinegar of Squills, and rub the teeth and gums with it; it not only whitens, but fastens and strengthens the roots of the teeth, and sweetens the breath.

### 38. Or,

TAKE Rose-water, Syrup of Violets, clarified Honey, and Plantain-water, of each half an ounce; Spirit of Vitriol one ounce; mix them all together; rub the  
teeth

teeth with a linen rag moistened in this Liquor, and then rince the mouth with Rose and Plantain Water, of each equal parts.

39. *Or,*

RUB them well with Nettle or Tobacco Ashes, or rather with Vine Ashes and a little Honey.

40. *An Opiate to whiten the Teeth.*

TAKE Gum Lacque, prepared Coral, Dragons-Blood, Cachoe, (an Indian perfume) of each an ounce; Cinnamon, Cloves, and Pellitory of Spain, of each six drachms; Red Sanders, Scuttle-bone, and calcined Egg-shells, of each half an ounce; Sea Salt decrepitated a drachm, all in fine powder: mix in a marble mortar into a proper consistence with a sufficient quantity of Honey of Roses.

41. *Another for the same Purpose.*

TAKE of the Ladies Powder (the receipt to make which is given in this book) an ounce; Red Lacque such as the painters use two drachms; Narbonne Honey clarified four ounces; Syrup of Mulberries two ounces; Essential Oil of Cloves two drops, and mix into an Opiate.

This Opiate is used like the Powder with a brush or prepared root, and has the same virtues.

42. *Manner of preparing the Roots for cleaning the Teeth according to Mr. Baumè.*

THE roots that are used to clean the teeth are formed at both ends like little brushes; and in all probability were substituted in the room of Tooth-brushes on account of their being softer to the gums and  
more

more convenient for use. They are used in the following manner; one of the ends is moistened with a little water, dipped into the Tooth-Powder or Opiate, and then rubbed against the teeth till they look white. Fibrous and woody Roots are best formed into little brushes, and on this account deserve a preference to others, such as those of Lucern, Marsh-mallows and Liquorice. The Roots are deprived of their juicy parts by boiling them several times in a large quantity of Water: the Water is changed every time of boiling. When Lucern Roots are used, those of two years growth are chosen about the thickness of one's little finger; such as are thicker, unsound or worm-eaten, are rejected: they are cut into pieces about six inches long, and as we have just observed, are boiled in water till all the juicy parts are extracted, which generally happens in about fifteen

ebullitions ; they are then taken out of the water and left to drain ; afterwards the point of a penknife is run a great many times through each end of the Root, in order to separate the ligneous fibres from each other, and make them look like a pencil or little brush, they are then slowly dried to prevent their splitting ; some people dip them afterwards in an infusion of liquorice for the sake of disguising them, then dry them afresh, and keep them for use. Liquorice Roots are prepared after the same manner. Marsh-mallow Roots are prepared in an easier way ; but they are very brittle when dry, on account of the Mucilage they contain, which by drying becomes very brittle itself. Such as are large and very even are made choice of, and rasped with a knife to remove the outer bark ; they are died red by infusing them in the same dye,

as is used to colour sponges \*. When the Roots have remained twenty four hours in the dye they are taken out, slowly dried, and varnished with two or three coats of a strong Mucilage of Gum Tragacanth, each coat being suffered to dry before another is laid on ; afterwards several coats of Friars Balsam are laid over the Mucilage, in order to form a more solid coat of varnish not susceptible of moisture.

Lucern and Liquorice Roots are dyed and varnished in the same manner : those of Marsh-mallows considerably diminish in thickness during the time they stand in infusion, from the loss of their Mucilage.

C 2

---

\* See Page 28.

43. *Manner of preparing Sponges for the  
Teeth.*

For this purpose very thin sponges are made choice of, which are to be washed in several waters by squeezing them with the hands, in order to loosen and force away the little shells which adhere to their internal surface; they are then dried and neatly cut into the shape of balls about the size of small eggs; when they have undergone this preparation, they are dyed in the following manner.

Take Brazil Wood rasped four ounces, Cochineal bruised three drachms, Roch-Alum half an ounce, Water four pints. Put all these ingredients together into a proper vessel, and boil till one half of the Liquor is wasted away; then strain the decoction through a piece of linen,  
and

and pour it hot upon the sponges, which are to be left infused therein for twelve hours, at the expiration of which time, the sponges are to be washed in several different waters to discharge the superfluous dye, till the last water remains not discoloured; they are then dried, and afterwards dipped in Spirit of Wine aromatized with Essential Oil of Cinnamon, Cloves, Lavender, &c. The sponges are now fit for use, and being squeezed dry, are kept in a wide mouthed glass-bottle well corked.

44. *Rules for the Preservation of the Teeth  
and Gums.*

THE teeth are bones thinly covered over with a fine enamel, and this enamel is more or less substantial in different persons. Whenever this enamel is worn through, by too coarse a powder, or too frequent

cleaning of the teeth, or eaten through by a scorbutic humour in the gums, the tooth cannot long remain sound, any more than a filbert kernel can, when it has been penetrated by a worm.

The teeth therefore are to be cleaned ; but with great precaution, for if you wear the enamel off faster, by cleaning the outside, than nature supplies it within, your teeth will suffer more by this method, than perhaps by a total neglect. A butcher's skewer, or the wood with which they are made, must be bruised and bit at the end, till with a little use it will become the softest and best brush for this purpose ; and, in general, you must clean your teeth with this brush alone, without any powder whatever ; and once in a fortnight, not oftener, dip your skewer brush into a few grains of gunpowder, breaking

breaking them first with the brush, and this will remove every spot and blemish, and give your Teeth an inconceivable whiteness. It is almost needless to say, that the mouth must be well washed after this operation; for besides the necessity of so doing, the salt-petre, &c. used in the composition of Gunpowder, would, if it remained, be injurious to the gums, &c. but has not, nor can have, any bad effect in so short a time. The Author has constantly practised this method for twenty-five years, and is thoroughly convinced it is safe and effectual.

It is necessary to observe, that very near the gums of people whose teeth are otherwise good, there is apt to grow a false kind of enamel, both within and without; and this enamel, if neglected, pushes the gum higher and higher, till it leaves the

fangs of teeth quite bare, above the enamel, so that sound teeth are destroyed, because the gum has forsaken that part, which is not sheathed and protected, in consequence of such neglect: This false enamel must therefore be carefully scaled off; for the gum will no more grow over the least particle of this false enamel, than the flesh will heal over the point of a thorn.

45. *An Opiate for stopping the Decay of  
Teeth.*

TAKE of Bole Armenian the quantity of a large nutmeg, a like quantity of Roch-Allum, two penny-worth of Cochineal bruised, and a small handful of the Chips of Lignum Vitæ; simmer them with four ounces of Honey in a new pipkin, for a little time, till the ingredients  
are

are mixed, well-stirring the mixture till taken off. To be used thus. Take a large skewer, and bind on the end of it a piece of linen rag; dip the rag in the medicine, and rub the teeth and gums with it. The longer you refrain from spitting, after the use of the remedy, the better. The Author has refrained from doing it for an hour. Wash the mouth well at least once every day, particularly after meals, first rubbing the teeth all round with salt upon the end of a finger. Teeth much decayed, or useless, should be drawn, if the operation can be performed with safety.

46. *An efficacious Tooth-Powder.*

TAKE Myrrh, Roch-Allum, Dragon's-Blood and Cream of Tartar, of each half an ounce, Musk two grains; and make them into a very fine powder. This, though simple, is an efficacious dentifrice,

but nothing of this kind should be applied too frequently to the teeth for fear of hurting the enamel.

47. *A Tincture to strengthen the Gums and prevent the Scurvy.*

TAKE an ounce of Peruvian Bark grossly powdered, infuse it a fortnight or longer in half a pint of Brandy. Gargle the mouth every night or morning, with a tea spoonful of this Tincture diluted with an equal quantity of Rose-water.

48. *A Powder to cleanse the Teeth.*

TAKE Pumice-Stone and scuttle-fish Bone, of each half an ounce ; Tartar of Vitriol and Mastich, of each a drachm ; Oil of Rhodium four drops ; mix all into a fine powder. An approved dentifrice.

The reader will find several other receipts for the teeth, under the article of Waters.

## W A T E R S.

49. *The Celestial Water.*

TAKE the best Cinnamon, Nutmegs, Ginger, Zedoary, Galangals, and White-Pepper, of each an ounce; six Lemon-peels pared thin; two handfuls of Damascene Grapes; as much Jujubs; an handful of Pith of Dwarf-Elder; four handfuls of Juniper-berries perfectly ripe; Fennel-Seeds, Flowers of Sweet Basil, St. John's-wort, Rosemary, Marjoram, Pennyroyal, Stechas, Musk Roses, Rue, Scabious, Centaury, Fumitory, and Agrimony, of each an handful; Spikenard, Aloes-wood, Grains of Paradise, Calamus Aromaticus, Mace, Gum Olibanum, and

Yellow Sanders, of each two ounces;  
Hepatic Aloes, fine Amber and Rhubarb,  
of each two drachms; all these drugs  
being procured good in their kind, beat  
those in a mortar that ought to be pulve-  
rized, and put the whole thoroughly mixed  
together into a large strong glass alembic  
or body, and pour as much genuine  
brandy thereon as will rise at least three  
fingers breadth above the ingredients; then  
having well closed the mouth of the alem-  
bic for fear the Spirit might evaporate,  
bury the vessel in very hot horse dung to  
digest for the space of fifteen days, and  
afterwards distill the Tincture in balneo  
mariaë, the water almost boiling hot;  
after having fixed an head and receiver  
to the alembic, and having well luted  
both, attend carefully to the distillation,  
and as soon as you perceive the water in  
the receiver changes its colour, instantly  
change

change the receiver, and separate its phlegm from your cordial, by a second distillation managed in the same manner. This second is the genuine Celestial water. *Note*, when you perceive this second water begin to lose its transparency and incline to a reddish colour, you put it by in a strong glass bottle closely stopped, and then dissolve in the marc or residue half a pound of the best Treacle, with as much Venice Turpentine and fresh Oil of Almonds; place the alembic in a sand heat, and urge the fire to the first degree, to have the genuine Balsamic Oil, which ought to be of the consistence of and resemble clarified Honey.

If a person rubs himself in the morning with this water on the forehead, eyelids, back of the head, and nape of the neck,  
it

it renders him quick and easy of conception, strengthens the memory, enlivens the spirits, and marvelously comforts the sight; by putting a few drops with a bit of cotton up the nostrils, it becomes a sovereign cephalic, and cleanses the brain of all superfluous cold and catarrhal humours; if a table-spoonful is drank every third day, it preserves the body in its full vigour, and in such good case, that beauty lasts even to decrepid old age. It is a noble remedy against shortness of breath, corrects it when bad, and possesses several other virtues which we have not room to mention at present.

50. *A Receipt to make the genuine Hungary-Water.*

PUT into an alembic a pound and an half of fresh pickt Rosemary Flowers; Pennyroyal and Marjoram Flowers, of each

each half a pound; and three quarts of good Coniac Brandy; having close stopped the mouth of the alembic to prevent the Spirit from evaporating, bury it twenty eight hours in horse dung to digest, and then distill off the Spirit in a water bath.

A drachm of Hungary-Water diluted with Spring-Water, may be taken once or twice a week in the morning fasting. It is also used by way of embrocation to bathe the face and limbs, or any part affected with pains, or debility. This remedy recruits the strength, dispells gloominess, strengthens the sight, and preserves it to extreme old age, gives an air of youth to the person who makes use of it, and is excellent for the stomach and breast, if those parts are bathed with it. It must always be used cold, whether taken inwardly as a medicine, or applied externally.

51. *Another Receipt to make Hungary-  
Water.*

FILL a glass or stone cucurbit half full of fresh gathered Rosemary-tops picked in their full prime, pour thereon as much Spirit of Wine as will thoroughly soak them ; put the vessel in a water bath, and having closely luted on the head and receiver, leave it to digest for three days on a gentle fire, and at the expiration of that period unlute the vessel, and pour back into the cucurbit whatever liquor you find in the receiver. Then lute your cucurbit again, and encrease the fire so as to cause the Spirit to come over the helm as fast as one drop can follow another : When about two thirds of the liquor are drawn off, remove the fire and let the vessel stand to cool ; you will find in the receiver

an

an excellent Hungary-Water, which is to be kept in a glass bottle closely stopped. Hungary-Water must be drawn off with a brisk fire, or the Spirit of Wine will come over the helm, very little impregnated with the essence of Rosemary.

52. *Directions for making Lavender-  
Water.*

FILL a glass or earthen body two thirds full of Lavender Flowers, and then fill up the vessel with Brandy or Melasses Spirits; let the Flowers stand in infusion eight days, or less if straitened for time, then distill off the Spirit, in a water bath with a brisk fire, at first in large drops or even a small stream, that the Essential Oil of the Flowers may rise with the Spirit; but as this can't be done without the phlegm coming over the helm at the  
same

same time, the Spirit must be rectified. The first distillation being finished, unlute the still, throw away what remains in the body, and fill it with fresh Flowers of Lavender, in the proportion of two pounds of Lavender Flowers to one pint of Spirit; pour the Spirit already distilled according to the foregoing directions, on the Lavender Flowers, and distill a second time in a vapour bath.

• 53. *Another Method.*

TAKE fresh or dried Lavender Flowers, sprinkle them with White Wine, Brandy, Melasses Spirit, or Rose-water, and let them stand in infusion for some days, and then distill off the Spirit. The distilled water will be more odoriferous, if the Flowers are dried in the sun in a glass bottle close stopped, and White Wine afterwards poured thereon.

If

If you would have speedily, without the trouble of distillation, a water impregnated with the flavour of Lavender, put two or three drops of Oil of Spike, and a lump of Sugar, into a pint of clear Water, or Spirit of Wine, and shake them well together in a glass phial, with a narrow neck. This Water, though not distilled, is very fragrant.

54. *To make Rose-water.*

To make an excellent Rose-water, let the Flowers be gathered two or three hours after sun rising in very fine weather, beat them in a marble mortar into a paste, leave them in the mortar soaking in their juice, for five or six hours, then put the mass into a coarse canvas bag, and press out the Juice; to every quart of Juice add a pound of fresh Damask Roses, and  
let

let them stand in infusion for twenty four hours ; then put the whole into a glass alembic, lute on an head and receiver, and place it in a sand heat ; distill at first with a gentle fire, which is to be encreased gradually till the drops follow each other as quick as possible ; draw off the water as long as it continues to run clear, then put out the fire, and let the alembic stand till cold. The distilled water at first will have very little fragrancy, but after being exposed to the heat of the sun about eight days, in a bottle lightly stopped with a bit of paper, it soon acquires an admirable scent.

55. *Or,*

INFUSE in ten or twenty pints of Juice of Damask Roses expressed in the manner above described, a proportionable quantity of Damask Rose-leaves gathered with the  
usual

usual precautions. After standing in infusion twenty-four hours, pour the whole into a short necked alembic, distill in a sand heat, and draw off as much as possible, taking care not to leave the residuum quite dry, for fear the distilled water should have an empyreumatic or still-burnt flavour. Throw away what remains at the bottom of the alembic; pour the distilled water a second time back into the alembic, and add a good quantity of fresh picked Damask Roses; lute it well, place it again in a sand heat, and repeat the distillation; but this second time, content yourself with a little above half the water you put back into the alembic; for instance, if it contained eight quarts, be satisfied with five or at most six quarts. To impress on Rose-water the utmost degree of fragrancy of which it is susceptible, it is absolutely necessary

necessary to expose it to the genial warmth of the sun.

Rose-water is an excellent lotion for the eyes, if used every morning, and makes a part in all collyriums prescribed for inflammations of these parts; it is also proper in many other complaints; but as its medicinal properties do not concern us at present, we shall say no more on that head.

56. *To make Orange-Flower Water.*

HAVING gathered (two hours before sun-rise, in fine weather) a quantity of Orange-Flowers, pluck them leaf by leaf, and throw away the stalks and stems: fill a tin cucurbit two-thirds full of these picked Flowers; lute on a low bolt-head, not above two inches higher than the cucurbit; place it in balneo mariæ, or a water-

water-bath, and distil with a fierce fire. You run no risk from pressing forward the distillation with violence, the water bath effectually prevents the Flowers from being burnt. In this method, you pay no regard to the quantity, but the quality of the water drawn off. If nine pounds of Orange Flowers were put into the still, be satisfied with three or four quarts of fragrant water; however, you may continue your distillation, and save even the last droppings of the still; they have some small fragrancy. During the operation, be careful to change the water in the refrigeratory vessel as often as it gets hot; its being kept cool prevents the distilled water from having an empyreumatic or burnt smell, and keeps the quintessence of the Flowers more intimately united with its phlegm.

57. *Another Method.*

TAKE four pounds of unpicked Orange-Flowers, bruise them in a marble mortar; pour on this quantity of Orange-Flowers, nine quarts of clear Water, distill in a cold still, and draw off five or six quarts, which will be exquisitely fragrant. If you are desirous of having it still higher flavoured, draw off at first full seven quarts, unlute the still and throw away the residuum; empty back the water already distilled, and add to it two pounds of fresh Orange-Flowers bruised; then lute the still again, repeat your distillation, and draw off five or six quarts; then stop, and be careful you don't draw off too much water, lest the Flowers should become dry and burn to.

The

The use of Orange-Flower Water is very extensive. It is in high esteem for its aromatic perfume; and is used with success for hystERIC complaints.

Waters from all kinds of flowers, are made in the same manner as Orange-Flower and Rose-water; but waters from dried odoriferous plants, such as Thyme, Hyssop, Marjoram and Wormwood, are made as follows.

Fill two thirds of a large stone jar with the tops of the plant you propose to distill, boil in a sufficient quantity of water some twigs or tops of the same plant; and when one half of the water has evaporated, pour the remainder into the jar over the flowers, and let them stand to infuse three or four days, then distill them in a common or cold still; take care not to distill

D

till

till dryness, you risque thereby the plant's burning to the bottom of the still, and to prevent this accident it is the best way never to draw off above two-thirds of the liquor put into the still. If you are desirous the distilled water should acquire an higher flavour, after the first distillation unlute the still, empty out what remains at the bottom as useless, fill it half full of fresh tops of the plant, pour thereon the water already distilled, repeat the distillation, and this second time the water drawn off will be highly odoriferous; and if the plant contains a large portion of Essential Oil, it will not fail to float on the top of the liquor contained in the receiver, and may be separated by the usual method.

58. *Magistral Balm-water.*

TAKE half a pound of Cinnamon, six ounces of Cardamon-seeds, and the same quantity of green Aniseeds, Cloves four ounces, Coriander-seeds eight ounces, beat these spices in a marble mortar, and put them into a stone jar; add the Yellow Rind of eight Lemons, a pound of right Juniper-berries bruised, twelve handfulls of Balm gathered in its prime before the plant runs to seed, six handfulls of Rosemary-tops, as much Sage, Hyssop, and Angelica, (the stalks of which are to be preferred to any other part of the plant;) Sweet Marjoram and Thyme, of each six handfulls; wormwood an handfull; cut all the herbs very small, put them into the jar to the spices, pour thereon four gallons of Brandy or Melasses Spirits, and let

the whole stand in infusion eight days, then empty the ingredients and liquor into an alembic of a common heighth, and distill in a water bath. At first draw off ten quarts, which are to be thrown again into the alembic, continue the same degree of fire for some time, then gradually lessen it till the aromatic spirit comes off in quick drops ; continue your distillation in this manner till you perceive the phlegm rise, which is easily known by the weakness of the Spirit. Then cease your distillation, and expose the aromatic spirit drawn off to the rays of the sun, in a glass bottle, stopped only with a loose paper cork, to give the fiery particles an opportunity of evaporating. What remains in the body of the still is not to be considered as wholly useless ; evaporate the remaining liquor to dryness, then burn the residuum of the plants and aromatics, and

and when the whole mass is reduced to ashes, throw the ashes into a vessel of boiling water, and let them boil up in the water two or three times, then remove the pot from the fire, and let the water stand till cold, when it is to be filtered through blotting paper. The water, which now appears limpid, is to be set on the fire again, and wholly evaporated away ; at the bottom of the vessel, which should be a new glazed earthen pot, will remain a pure white fixed salt, which may be dissolved in the Magistral Balm-water.

This water is highly esteemed, and has even acquired a reputation equal to that of Hungary-water, (the receipt for preparing which has been already given) and in particular cases is preferable.

59. *Compound Balm-water, commonly  
called Eau de Carmes.*

TAKE of the fresh Leaves of Balm a quarter of a pound, Yellow Rind of fresh Lemon-Peels, two ounces, Nutmegs and Coriander-seeds, of each one ounce, Cloves, Cinnamon and Angelica Root, of each half an ounce; having pounded the spices and seeds, and bruised the leaves and roots, put them with a quart of Brandy into a glass cucurbit, of which stop the mouth, and set it in a warm place to remain there two or three days. Add then a pint of simple Balm-water, and shake the whole well together, after this distill by drops in a vapour bath till the ingredients are left almost dry, and preserve the water thus obtained in bottles well stopped.

This

This water has been long famous at Paris and London, and carried thence to most parts of Europe: It has the reputation of being a cordial of very extraordinary virtues, and not only of availing in all lowness of spirits, but even in apoplexies, and is also much esteemed in cases of the gout in the stomach, whence the Carmelite Friars, who originally were in possession of this secret, have reaped great benefit from the sale of this water; but notwithstanding the great care they have taken to keep their receipt from the knowledge of the world, the public may depend upon it, this is the real method by which they prepare it. It is used externally to brace up the skin in relaxed habits.

60. *Sweet Honey-water.*

TAKE of good French Brandy a gallon, of the best Virgin Honey and Coriander Seeds, each a pound, Cloves an ounce and half, Nutmegs an ounce, Gum Benjamin and Storax, of each an ounce, Vanilloes No. 4, the Yellow Rind of three large Lemons; bruise the Spices and Benjamin, cut the Vanilloes into small pieces, put all into a cucurbit, and pour the Brandy on them; and after they have digested forty eight hours, distill off the Spirit in a retort with a gentle heat.

To a gallon of this water, add of Damask Rose-water and Orange Flower-water, of each a pint and an half, Musk and Ambergrease, of each five grains; first grind the Musk and Ambergrease with some of the water, and afterwards put all together into a large matraass, shake them  
well

well together, and let them circulate three days and nights in a gentle heat, then let all cool: filtre and keep the water in a bottle well stopped for use.

It is an antiparalytic, smoothes the skin, and gives one of the most agreeable scents imaginable. Forty or sixty drops put into a pint of clear water, are sufficient to wash the hands and face with.

61. *Sweet scented Water.*

TAKE Orange Flower-water and Rose-water, of each an equal quantity, put them into a large wide mouthed glass, and strew upon the surface gently as much Jessamine Flowers as will cover it; then tie the mouth of the glass over so carefully that the Flowers be not shook down to the bottom: and this method repeat, letting each quantity of the Flowers remain five

or six days, until the water is strongly scented with them: then dissolve Amber-grease and Musk, of each a scruple, in a few ounces of the water, which filtre and put to the rest.

This water may also be made by putting the whole into a retort with a sufficient quantity of Jessamine Flowers, and drawing it off in a vapour bath into a receiver well luted.

A most fine perfume, and taken inwardly is of service in some nervous cases and languors.

62. *German sweet scented Water.*

BEGIN with infusing eight days in two quarts of Vinegar, two handfuls of Lavender Flowers, as many Province Roses picked from the stalks, Wild Roses, and  
Elder

Elder Flowers ; while they stand in infusion prepare a simple odoriferous water as follows : Put into a glass body the Yellow Rind of three Lemons, sweet Marjoram, Lillies of the Valley and Lavender Flowers, of each two handfulls, pour thereon a pint of double distilled Rose-water, and a quart of Spring-water. Lute on a bolt head, place the alembic in a sand heat, fix on a receiver, and leave matters in this state two days, then light a fire under it and distil by hasty drops. When you have drawn off a quart, stop your distillation, and keep this simple odoriferous water for the following use.

Take wild Thyme, sweet Marjoram, sweet Basil, and Thyme, of each an handful, Lavender Flowers, Province Roses, Spikenard, and Bastard Marjoram, of each a large pinch, Florentine Orrice and

Cinnamon, of each half an ounce, Cloves, Mace, strained Storax, and Benjamin, of each three drachms, Labdanum two drachms, Aspalathum half an ounce, Socotorine aloes half a drachm; put all these ingredients thoroughly bruised into a stone jar, add thereto the Vinegar infusion, the distilled odoriferous water, and a quart of Frontiniac, Mountain, or Cowslip Wine, stir them well together, and leave the whole to digest for fifteen days, at the expiration of which time, empty the infusion into a glass body, large enough to contain a sixth part more liquor; lute on the head, place it in a sand heat, and begin your distillation with a very gentle fire; after some time, gradually increase the violence of the fire; it sometimes happens that the phlegm of the Vinegar comes over the helm first, when that is the case, set it aside as useless; as soon as the Spirit begins

gins to rise, which you will directly perceive by its aromatic subtilty, fix a receiver on the beak of the alembic, and distill off about three pints, keep this by itself as the most spirituous part of your preparation ; and continue to draw off the remainder as long as it runs clear.

The German sweet scented Water is penetrating and incisive, admirably revives the vital Spirits, removes head-aches, comforts the heart, is excellent against unwholesome air, and of course a certain preservative from contagion.

63. *Imperial Water.*

TAKE five quarts of Brandy, dissolve therein an ounce of Frankincense, Mastic, Benjamin, and Gum Arabic ; add half an ounce of Cloves and Nutmegs ; an ounce and an half of Pine-nut Kernels, and  
sweet

sweet Almonds ; and three grains of Musk ; bruise these ingredients in a marble mortar, distill in a vapour bath, and keep the water that is drawn off in a glass bottle close stopped.

This water takes away wrinkles, and renders the skin extremely delicate ; it also whitens the Teeth and cures the tooth-ache, sweetens the breath, and strengthens the gums. Foreign ladies prize it highly.

64. *Odoriferous Water.*

TAKE sweet Basil, Mint, sweet Marjoram, Florentine Orrice-root, Hyssop, Balm, Savoury, Lavender, and Rosemary, of each an handful ; Cloves, Cinnamon, and Nutmegs, of each half an ounce ; three or four Lemons, cut in thick slices ; infuse them three days in a good quantity of Rose-water ; distill in a water bath with  
a gentle

a gentle fire, and add to the distilled water  
a scruple of Musk.

65. *Or,*

TAKE sweet Marjoram, Thyme, Lavender, Rosemary, Pennyroyal-buds, red Roses, Violet-flowers, Clove-july-flowers, Savoury, and Orange-peels, of each equal parts ; infuse in White-Wine till they entirely sink to the bottom of the Wine ; then distill in an alembic, two or three times. Keep the Water in bottles well corked ; and preserve the residuum as a perfume.

66. *The Ladies Water.*

TAKE two handfals and an half of Red Roses ; Rosemary-flowers, Lavender, and Spikenard, of each an handful ; Thyme, Chamomile-flowers, Sage of Virtue, Pennyroyal, and Marjoram, of each  
an

- an handful; infuse in White-Wine twenty four hours; then put the whole into an alembic; sprinkle it with good White-Wine, and then throw on the following powder, composed of an ounce and an half of choice Cloves, Gum Benjamin, and Storax strained, of each two drachms. The distilled Water is to be kept in a bottle well stopped.

67. *A beautifying Wash.*

TAKE equal parts of White Tansey, and Rhubarb Water, and to every half pint add two drachms of Sal-Armoniac.

This fluid is applied with a feather or hair pencil, three or four times a day, to pimples or tetters, on any part of the body.

68. *A Cosmetic Water.*

WASH the face with the tears that issue from the Vine, during the months of May and June.

69. *An excellent Cosmetic.*

PIMPERNEL Water is so sovereign an helper of the complexion, that it ought always to have a place on a Lady's toilet.

70. *Venice Water, highly esteemed.*

IN the month of May, take two quarts of a black Cow's Milk, pour it into a bottle with eight Lemons and four Oranges, sliced; add an ounce of Sugar Candy, and half an ounce of Borax; distill in a water bath or sand heat.

This

This water is counterfeited at Bagdat in Persia, in the following manner. Take twelve Lemons peeled and sliced, twelve new laid Eggs, six sheeps Trotters, four ounces of Sugar Candy, a large slice of Melon, and another of Pompion, and two drachms of Borax ; distill in a large glass alembic with a leaden head.

71. *A Balsamic Water.*

TAKE a pound of Venice Turpentine ; Oil of Bays, Galbanum, Gum Arabic, Ivy Gum, Frankincense, Myrrh, Hepatic Aloes, Aloes-wood, Galangals, Cloves, Comfrey, Cinnamon, Nutmegs, Zedoary, Ginger, and White Dittany, of each three ounces ; Borax, four ounces ; Musk a drachm ; Ambergrease a scruple ; infuse the whole in six quarts of Brandy, after having bruised the ingredients capable of being powdered. Distill it, and the

the Balsamic Water drawn off, will be good to strengthen the limbs, and cause that beauty and vigour which so amazingly delights the eye.

72. *Angelic Water, of a most agreeable Scent.*

Put into a large alembic the following ingredients, Benjamin four ounces, Storax two ounces, Yellow Sanders an ounce, Cloves two drachms, two or three bits of Florentine Orrice, half the Peel of a Lemon, two Nutmegs, half an ounce of Cinnamon, two quarts of Rose-water, a pint of Orange Flower-water, and a pint of Magistral Balm-water; put the whole into an alembic well luted, distill in a water bath, and what you draw off will prove an exquisite Angelic Water.

73. *Nosegay or Toilet Water.*

TAKE Honey-water an ounce, Eau fans Pareille two ounces ; Jasmine-water not quite five drachms ; Clove-water, and Violet-water, of each half an ounce ; Cyprus-water, sweet Calamus-water, and Lavender-water, of each two drachms ; Spirit of Neroli or Oranges ten drops ; mix all these Waters together, and keep the mixture in a vial close corked.

This water has a delightful scent, its only use is for the toilet, possessing no medicinal virtues.

74. *Spirit of Guaiacum.*

SPIRIT of Guaiacum is prepared by infusing two ounces of Guaiacum Shavings in a quart of Brandy, ten or twelve days,

days, shaking the vessel now and then. The Tincture is then filtered thro' paper, and used to gargle the mouth in the same manner as the Vulnerary-water.

75. *The Divine Cordial.*

To make this, Take in the beginning of the month of March, two ounces of the Roots of the true Acorus, Betony, Florentine Orrice-roots, Cyprus, Gentian, and sweet Scabious ; an ounce of Cinnamon, and as much Yellow Sanders ; two drachms of Mace ; an ounce of Juniper-Berries ; and six drachms of Coriander-seeds ; beat these ingredients, in a mortar, to a coarse powder, and add thereto the outer Peel of six fine China Oranges ; put these ingredients in a large vessel, with a gallon and an half of Spirit of Wine ; shake them well, and then cork the vessel tight till the season for Flowers ; and when  
each

each Flower is in full vigour, add half an handful of the following: viz. Violets, Hyacinths, Jonquils, Wall Flowers, Red, Damask, White, and Musk Roses, Clove-july-flowers, Orange Flowers, Jasmine, Tuberoses, Rosemary, Sage, Thyme, Lavender, sweet Marjoram, Broom, Elder, St. John's-wort, Marigold, Chamomile, Lillies of the Valley, Narcissus's, Honeyfuckle, Borage, and Bugloss.

Three seasons are required to procure all these Flowers in perfection; Spring, Summer and Autumn: every time you gather any of these Flowers, add them immediately to the infusion, and mix them thoroughly with the other ingredients; and three days after you have put in the last Flowers, put the whole into a glass cucurbit, lute on the head carefully, place it in a water bath over a slow fire, keep  
the

the receiver cool, and draw off five quarts of Spirit, which will prove of a rare quality : as a medicine, far more efficacious than Balm-water ; and for its fine scent, one of the best perfumes.

76. *Compound Cyprus Water.*

TAKE a gallon of Spirit of Jasmine, infuse therein half an ounce of Florentine Orrice grossly powdered, a quarter of an ounce of bruised Angelica-seeds, three scraped Nutmegs, three ounces of White Musk-roses bruised, a drachm of Spirit of Orange, and fifteen drops of Essence of Ambergrease ; if it is not the season for Roses, when you make this Water, put instead of Roses a pint of Rose-water scented with Musk, and if that can't be procured, use common Rose-water ; draw off the Spirit in a water bath, and in a stream.

stream like a thread, and be sure to place the receiver in cold water, that the Spirit may cool as fast as possible, it will thereby the better preserve its perfume.

77. *Imperial Water.*

Put into a gallon of Brandy, a quarter of a pound of picked Violets, an ounce of Florentine Orrice, a quarter of a pound of double Jonquils, two ounces of picked Orange Flowers, two ounces of White Musk-roses, three ounces of Tuberoses, a drachm of Mace, half a drachm of Cloves, an ounce of Quintessence of Bergamot, and an ounce of Quintessence of Oranges; all the Flowers must be gathered in their proper season. Observe to put into the Brandy at the same time with the Violets, the Orrice, Mace, and Cloves, in gross powder, then add the different Flowers as they come in season, remembering

bering not to add the quintessences, till after the Tuberoses, which are the last Flower. Every time you put in a fresh Flower, shake the vessel, and cork it very tight. Eight days after the Tuberoses have been infused, put the whole into a glass body, lute on the head carefully, and place under the receiver an earthen vessel filled with cold water, that the Spirit may cool as fast as it comes over, by which means its perfumed scent will be the better preserved. You may draw off two quarts of a rectified Spirit, that will give perfect satisfaction to the most delicate and nicest judge.

78. *All Flower Water.*

To make it, pour into a large vessel five quarts of strong Spirit of Wine, and infuse therein the following Flowers, as they come in season; Violets, Hyacinths,

E

and

and Wall Flowers, of each a quarter of a pound; single and double Jonquils, of each two ounces; a quarter of a pound of Lillies of the Valley, and the same quantity of Spanish Jasmine; half an ounce of Rosemary Flowers; an ounce of Elder Flowers; two ounces of Wild, Damask, and White Roses bruised; three ounces of Orange Flowers; a quarter of a pound of Clove-july-flowers, Syringo Blossoms, Tuberoses, and Tops of Mint in Flower; and thirty drops of Quintessence of Musk-seed; which however need not be added till the time of Distillation, which must not be till three days after the last Flowers were set in infusion. Perform the operation in a water bath, and having carefully luted the head, and receiver which must be placed in a tub of cold water, to preserve the scent, draw off about three quarts and a pint with a moderate

fire, then change the receiver, fix on another, and draw off another pint, which though of an inferior quality, is well worth preserving. This is the genuine receipt.

79. *A curious Water known by the Name of the Spring Nosegay.*

TAKE six ounces of Hyacinths, a quarter of a pound of picked Violets, the same quantity of Wall Flowers picked, and Jonquils; an ounce of Florentine Orrice bruised; half an ounce of Mace grossly powdered; and two ounces of Quintessence of Orange. Put the whole, the Jonquils, Wall Flowers, and Lillies of the Valley excepted, about the end of March, into a glass body, with a gallon of strong Spirit of Wine; bruise the Hyacinths, Violets, Orrice, and Mace, and towards the end of April, add the Jonquils when in their highest perfection,

that is to say, when full blown. A few days after, put in the Wall Flowers, the Petals only, then add the Lillies of the Valley carefully picked, and shake all the ingredients well: Eight days after having put in this last Flower, empty the infusion into an alembic, lute on an head, and receiver which must be placed in cold water, and distill in a water bath, with a gentle fire. From the above quantity three quarts of excellent Spirit may be drawn off, that justly deserves the appellation of the Spring Nofegay.

80. *A Cosmetic Water, of great Use to prevent Pitts after the Small-Pox.*

DISSOLVE an ounce and an half of Salt in a pint of Mint-water; boil them together, and skim the Liquor. It is very useful to wash the face with after the  
Small-

Small-Pox, in order to clear away the scabs, allay the itching, and remove the redness.

81. *A Cooling Wash.*

INFUSE in a sufficient quantity of clear Water, some Bran, Yolks of Eggs, and a grain or two of Ambergrease, for three or four hours, then draw off the Water by distillation, which will prove an excellent Cosmetic, and clear the skin surprisingly. It is of service to keep it in the sun eight or ten days in a bottle well corked.

The distilled Waters of Melons, Bean Flowers, the Wild-Vine, green Barley, that is, Barley before the Seed has lost its milky consistence, and the Water that is found in vesicles on the leaves of the elm tree, may also be used for the same intention.

82. *An excellent Water to clear the Skin,  
and take away Pimples.*

TAKE two quarts of Water, in which a quantity of Horse-beans have been boiled till quite soft, put into an alembic, and add two handfuls of Pimpernel, the same quantity of White Tanfy, a pound of Veal minced small, six new laid Eggs, and a pint of White-Wine Vinegar; distill this mixture in a water bath, and it will afford an excellent lotion to remove all eruptions on the face, if washed therewith every night and morning.

83. *Another.*

KNEAD a Loaf with three pounds of Wheaten Flour, a pound of Bean Flour, and Goats Milk, with mild Yeast  
or

or Leaven. Bake it in an oven, scoop out the crumb, and soak it thoroughly in new Goats Milk and six Whites of Eggs; add an ounce of calcined Egg-Shells. Mix all well together, and distill in a sand heat, and you will have an excellent cosmetic water, by washing with which every day, the face will become smooth and clear as Chrystal.

84. *Venetian Water to clear a Sun-burnt  
Complexion.*

TAKE a pint of the Milk of a Black Cow, or, in the month of May, a pint of the Water that distills from the Vine when wounded, eight Lemons and four Seville Oranges cut in thin slices, two ounces of Sugar Candy, half an ounce of Borax, in fine powder, and four Narcissus Roots beaten to a paste, distill these ingredients in a vapour bath. Rectify the distilled Li-

82. *An excellent Water to clear the Skin,  
and take away Pimples.*

TAKE two quarts of Water, in which a quantity of Horse-beans have been boiled till quite soft, put into an alembic, and add two handfuls of Pimpernel, the same quantity of White Tansey, a pound of Veal minced small, six new laid Eggs, and a pint of White-Wine Vinegar; distill this mixture in a water bath, and it will afford an excellent lotion to remove all eruptions on the face, if washed therewith every night and morning.

83. *Another.*

KNEAD a Loaf with three pounds of Wheaten Flour, a pound of Bean Flour, and Goats Milk, with mild Yeast  
or

or Leaven. Bake it in an oven, scoop out the crumb, and soak it thoroughly in new Goats Milk and fix Whites of Eggs; add an ounce of calcined Egg-Shells. Mix all well together, and distill in a sand heat, and you will have an excellent cosmetic water, by washing with which every day, the face will become smooth and clear as Chrystal.

84. *Venetian Water to clear a Sun-burnt  
Complexion.*

TAKE a pint of the Milk of a Black Cow, or, in the month of May, a pint of the Water that distills from the Vine when wounded, eight Lemons and four Seville Oranges cut in thin slices, two ounces of Sugar Candy, half an ounce of Borax, in fine powder, and four Narcissus Roots beaten to a paste, distill these ingredients in a vapour bath. Rectify the distilled Li-

quor by the same method, and keep it in a bottle closely corked.

85. *A Water for Pimples in the Face.*

Boil together an handful of the herbs Patience, and Pimpernel in Water; and wash yourself every day with the decoction.

86. *A Fluid to clear a tanned Skin.*

TAKE unripe Grapes, soak them in Water, sprinkle them with Alum and Salt, then wrap them up in paper, and roast them in hot ashes; squeeze out the Juice, and wash the face with it every morning, it will soon remove the Tan.

87. *A Fluid to whiten the Skin.*

TAKE equal parts of the Roots of Centaury and the White Vine, a pint of Cows Milk, and the crumb of a White Loaf; distill in a glass alembic. The distilled Water for use, must be mixed with an equal quantity of Hungary Water: It then admirably clears the complexion.

The distilled Waters of Fennel, and White Lillies, with a little Gum Mastic, will produce the same effect.

88. *A Beautifying Wash.*

PUT into a cucurbit five pints of French Brandy, add thereto a pound and an half of Crumb of Bread, three ounces of Plumb-tree-gum, two ounces of Litharge of

E 5

Silver

Silver in fine powder, and four ounces of sweet Almonds; the ingredients are to be beat together into a paste, and left to digest in the Spirit eight days; then distill in a vapour bath, and wash the face and hands with the water that is drawn off, which must be suffered to dry on the skin without being wiped off, and the complexion will presently become as clear and glossy as a looking glass.

89. *A distilled Water that tinges the Checks a beautiful Carnation Hue.*

TAKE two quarts of White-Wine Vinegar, three ounces of Isinglass, two ounces of bruised Nutmegs, and six ounces of Honey; distill with a gentle fire, and add to the distilled Water a small quantity of Red Sanders, in order to colour it. Before this Tincture is used, a Lady should wash

wash herself with Elder-Flower Water, and then the cheeks will become of a fine lively vermilion, that cannot be distinguished from the natural bloom of Youth.

90. *A Cosmetic Water.*

TAKE three Aron Roots minced small, three Melons of a middling size, three Cucumbers, four new laid Eggs, a slice of a Pumpkin, two Lemons, a pint of Whey, a gallon of Rose-water, a quart of Water-Lilly-water, a pint of Plantain, as much White Tansy-water, and half an ounce of Borax. Distill the whole together in a vapour bath.

91. *A Water, christened, the Fountain of Youth.*

TAKE an ounce of Sulphur Vivum, Olibanum and Myrrh, of each two ounces, six drachms of Amber, a quart of Rose-

E 6

water ;

## 84 THE TOILET

water; distill the whole in a vapour bath, and wash yourself with the Water every night going to rest: The next morning wash yourself with weak Barley-water, and your complexion will have an youthful air.

It is asserted also that the distilled Water of green Pine-apples, takes away wrinkles, and gives the complexion an air of youth.

### 92. *A Water to preserve the Complexion.*

Mix together Water-Lilly Water, Bean-Flower Water, Melon Water, Cucumber Water, and Lemon Juice, of each an ounce; add thereto of Bryony, Wild Succory, White Lillies, Borrage and Bean-Flowers, of each an handful; take seven or eight White Pidgeons, pick them, and cut off their heads and pinions, mince the rest of them small, and put into an  
alembic

alembic with the other ingredients; to which add four ounces of Sugar Candy in powder, as much Camphor, and the Crumb of three small White Loaves, each weighing about half a pound; digest the whole eighteen or twenty days in an alembic, then distill, and keep the Water that is drawn off in proper vessels for use. Before the face is washed with it, carefully observe to cleanse the face with the following composition.

Take a quarter of a pound of the Crumb of Rye Bread hot from the oven, the Whites of four new laid Eggs, and a pint of White-Wine Vinegar; beat the whole well together, and strain through a linen rag. The use of these two preparations perfectly cleanses and clears the skin, preserves its freshness, and prevents wrinkles.

93. *A Water that gives a Gloss to the Skin.*

TAKE an handful of Bean, Elder, and Bugloss Flowers, a small Pidgeon clean drawn, the Juice of two Lemons, four ounces of Salt, and five ounces of Camphor; distill them in a vapour bath; add to the distilled Water a few grains of Musk, and expose it to the sun for the space of a month, observing to take the vessel in doors every night. The way to use this Water, is to dip the corner of a fine napkin in it, and gently rub the face therewith.

94. *A Preservative from Tanning.*

INFUSE in clean Water for three days a pound of Lupines, then take them out of the Water, and boil them in a copper vessel with five quarts of fresh Water.

When

When the Lupines are boiled tender, and the Water grows rather ropy, press out the Liquor, and keep it for use. Whenever you are under a necessity of exposing yourself to the sun, wash the face and neck with this preparation.

The Oil of unripe Olives, in which a small quantity of Gum Mastic has been dissolved, possesses the same virtue.

95. *To remove Freckles.*

TAKE Houseleek, and Celandine, of each an equal quantity; distill in a sand heat, and wash with the distilled Water.

96. *Or,*

APPLY the Juice of Onions to the part affected.

97. Or,

Boil Ivy Leaves in Wine, and foment the face with the decoction.

98. *A Water to prevent Freckles, or Blotches in the Face.*

TAKE Wild Cucumber-Roots and Narcissus-Roots, of each an equal quantity, dry them in the shade and reduce them to a very fine powder, which put into strong French Brandy, and wash the face therewith, till it begins to itch, then wash with cold water. This must be repeated every day till a perfect cure is obtained, which will soon happen, for this water has a slight caustic property, and of course must remove all spots on the skin.

99. *Or,*

TAKE an handful of fresh Wood-ashes, boil them in a pint of clear Water, till one half is wasted away, then pour off the Liquor as long as it runs clear, boil it again a little while, and filter it through paper made of woollen rags.

100. *A Water to improve the Complexion.*

TAKE Snakeweed-Roots and Narcissus-Roots, of each an equal Quantity, a pint of Cows Milk, and the Crumb of a White Loaf, distill these ingredients in a glass alembic: for use, the distilled Water should be mixed with an equal quantity of Hungary-water.

101. *Or,*

TAKE Chich-Peas, French Beans, and Garden Beans, of each four ounces, peel  
off

off their skins, powder them, and infuse in a quart of White-Wine; add the Gall of an Ox, and the Whites of fifteen new laid Eggs; mix the ingredients thoroughly, distill in a glass alembic with a sand heat; and wash the face with the distilled Water, as occasion requires.

[ 102. *A Cosmetic Water.*

TAKE a pound and an half of fine Wheaten Bread, four ounces of Peach Kernels, the same quantity of the four Cold Seeds, viz. Gourd Seed, Cucumber Seed, Melon Seed, and Lettuce Seed; the Whites of twelve new laid Eggs, the Juice of four Lemons, three ounces of Sugar Candy, a gallon of Goats Milk; mix the whole together, and distill in a vapour bath: to every two quarts of the distilled Water, add a quarter of a pint of Spirit of Cherries.

103. *Or,*

TAKE six Aron Roots minced small, six ounces of Bran, four ounces and an half of Myrrh in powder, three pints of Milk, and the same quantity of Wine, distill according to the rules of art; and to the distilled Water, add a small bit of Alum.

104. *A simple Balsamic Water, which removes Wrinkles.*

TAKE Barley-water, strain it through a piece of fine linen cloth, and drop therein a few drops of Balm of Gilead; shake the bottle incessantly for ten or twelve hours together, until the Balsam is entirely incorporated with the Water, which is known by the turbid milky appearance of the Water. This mixture marvelously embellishes the complexion, and preserves the bloom of youth. If used only once  
a day,

a day, it takes away wrinkles, and gives the skin a surprising lustre. Before this precious fluid is used, the face should be washed clean with rain water.

105. *A Water to change the Eyebrows black.*

FIRST wash your eyebrows with a decoction of Gall-nuts; then wet them with a pencil or little brush dipped in a solution of Green Vitriol, in which a little Gum Arabic has been dissolved, and when dry, they will appear of a beautiful black colour.

106. *To remove Worms in the Face.*

MAKE use of the distilled Waters of the Whites of Eggs, Bean Flowers, Water Lillies, White Lillies, Melon Seeds, Iris Roots, Solomon's Seal, White Roses, or crumb of Wheaten Bread, either mixed together,

together, or separately, with the addition of the White of a new laid Egg.

107. *The Dutcheſs de la Vrilliere's Mouth  
Water.*

TAKE Cinnamon two ounces, Cloves six drachms, Water Cresses six ounces, fresh Lemon Peel an ounce and an half, Red Rose Leaves an ounce, Scurvy Grass half a pound, Spirit of Wine three pints. Bruise the Spices, cut the Water Cresses and Scurvy Grass small, and macerate the whole in the Spirit of Wine in a bottle well corked, the space of twenty four hours; then distill to dryness in a vapour bath, and afterwards rectify the distilled Water by repeating the same process.

This Water strengthens the gums, prevents the scurvy, and cures apthæ, or little cankers and ulcerations in the mouth.

It

It is used to gargle the mouth with, either by itself, or diluted with water, as occasion may require.

108. *Another Water for the Teeth, called Spirituous Vulnerary Water.*

For this intention are commonly used Spirituous Waters that are no ways disagreeable, waters proper to strengthen and fortify the gums; as Spirituous Vulnerary Water tinctured with Cochineal, or Seed Lac, Guaiacum Water, or the Dutcheſs de la Vrilliere's Water above deſcribed.

To tinge Vulnerary Water, put any quantity into a glaſs matras, and infuſe therein ſome bruised Cochineal, then filter the Vulnerary Water, and uſe it to gargle the mouth, after which the teeth are to be cleaned with Tooth Powder, or an Opiate.

It

It may be lowered when found too strong, by the addition of Spring Water.

109. *Receipt to make Vulnerary Water.*

TAKE fresh gathered Leaves of Sage, Angelica, Wormwood, Savoury, Fennel, and spiked Mint, of each four ounces; Leaves of Hyssop, Balm, Sweet Basil, Rue, Thyme, Marjoram, Rosemary, Origanum, Calamint, and Wild Thyme, fresh gathered, of each four ounces, the same quantity of Lavender Flowers, and a gallon of rectified Spirit of Wine.

Cut the Herbs small, infuse them ten or twelve hours in the Spirit of Wine, and then distil in a vapour bath; preserve the Spirit drawn off, in a bottle well corked.

110. *A Water for the Gums.*

TAKE of the best Cinnamon an ounce, Cloves three drachms, the Yellow Peel of two Lemons, Red Rose Leaves half an ounce, Water Cresses half a pound, Scurvy Grass four ounces, rectified Spirit of Wine three gallons; bruise the Spices, and infuse the whole a sufficient length of time in the Spirit in a glass vessel; then distill off the Spirit for use, in a vapour bath.

111. *Another, prepared by Infusion.*

TAKE two drachms of Cinnamon finely powdered, half a drachm of Cloves in fine powder, and half an ounce of Roch Alum, pour thereon three gallons of boiling Water; when cold add six ounces of Plantain Water, half an ounce of Orange Flower Water, a quarter of an ounce of Essence of Lemons, and a gill and an half of rectified

rectified Spirit of Wine; let the whole stand together in digestion four and twenty hours, then filter through paper, and reserve the clear water for use.

112. *Cr,*

TAKE Mace, Cinnamon, Cloves, Pellytory of Spain, and Terra Sigillata, or sealed Earth, of each half an ounce; beat the whole together in a mortar, and infuse it a month in a quart of Spirit of Wine. Strain off the Spirit, and add eight ounces of Spirit of Scurvy Grass. Drop six or seven drops in a glass of very clear Water, and rinse the mouth, then rub the gums with conserve of Hips acidulated with five or six drops of Spirit of Vitriol.

113. *Another Water for the Gums.*

TAKE of the best Cinnamon an ounce, Cloves three drachms, the Peel of two Lemons, half an ounce of Red Rose Leaves, half a pound of Water Cresses, four ounces of Scurvy Grass, and three gallons of rectified Spirit of Wine. Bruise the Spices, and let the whole stand in digestion in a glass vessel twenty four hours, then distill in a vapour bath.

114. *A simple Depilatory.*

OIL of Walnuts frequently rubbed on a child's forehead, will prevent the hair from growing on that part.

115. *Prepared Sponges for the Face.*

STEEP in Water some time the finest and thinnest Sponges you can pick out, wash them well, dry them, and then  
soak

soak them in Brandy a whole day ; then squeeze the Brandy out and dry them again ; lastly, dip them in Orange Flower Water, and let them remain therein eleven or twelve hours. When squeezèd, and thoroughly dried, they are now fit for use.

116. *Spirit of Roses.*

To make the inflammable Spirit of Roses, take twenty pounds of Damask Roses, beat them to a Paste, in a marble mortar, put this Paste layer by layer, with sea salt, into a large stone jar, or two jars if one is not large enough to contain the whole quantity ; that is to say, sprinkle every layer of the Paste about half an inch thick with Salt ; and press the layers of Roses as close together as possible. Cork the jar with a waxed Cork, cover the uppermost end of the cork and the edges of the mouth of the jar with wax also, and

## 100 THE TOILET

place the jar six weeks or two months, in a vault or some other cool place. At the expiration of this period open the jar; if it exhales a strong vinous smell, the fermentation has arrived at its proper height, if you do not perceive such an odour, throw into the jar a little Yeast, and stop the jar close in the same manner as before, to prevent the air from penetrating into it. When a strong fermentation is excited, take five or six pounds of your fermented Rose Paste, put it into a common cucurbit, and distill it with a very gentle fire in a vapour bath. When you have drawn off as much water as you possibly can, unlute the alembic, throw away what remains in the cucurbit, take five or six pounds more of the fermented Paste of Roses, and put into the cucurbit together with the Water already drawn off, and distill in a vapour bath with such a degree of  
of

of fire, as will cause the distilled Water to run off in a middling sized stream. When you can draw off no more, empty the cucurbit, fill it again with fresh fermented Paste of Roses, and pour thereon all the distilled Water that the preceeding distillations have produced; distill as before, and repeat these operations till you have used all your fermented Paste of Roses. Every time you open the jar, be careful to cork it close, otherwise the most spirituous particles will evaporate and be lost; after the last distillation, you will have obtained a very fine scented Water, but not very spirituous, because loaded with a considerable quantity of phlegm, it must therefore be rectified.

For this purpose make choice of a very long necked glass matras of a reasonable size, fill it about three parts full with your

unrectified Spirit of Roses, fit on a bolt head and receiver, lute the joints carefully, and distill in a vapour bath with a very slow fire. When you have drawn off about a tenth part of what was put into the matras, let the vessel cool, and set apart the Spirit that is found in the receiver. What remains in the matras must not be thrown away as useless, for it is a Rose-water far superior to what is prepared according to the usual method.

After the first rectification of a part of your unrectified Spirit, repeat the same operation with a part of the remaining unrectified Spirit, till the whole is rectified, and then rectify them all together once more. After this last operation, you will obtain an highly penetrating and inflammable Spirit of Roses; the phlegmatic part that remains in the matras may be added

added to that procured from the preceeding rectifications, and the whole kept for use in a cellar or other cool place in a bottle well corked.

The scent of inflammable Spirit of Roses is ravishingly sweet; if only two drops of it are mixed with a glass of Water, they impart to the Water so high a perfume, that it exceeds the very best Rose-water.

117. *Inflammable Spirits of all Kinds of Flowers.*

To distill an inflammable Spirit from Flowers of all kinds, the preceeding method must be used; as also to procure one from all kinds of vegetables: only observe that in plants, and dried flowers, as Thyme, Betony, Mint, Stechas, Vio-

## 104 THE TOILET

lets, and Jasmine, the Seeds must be bruised with the Flowers and Roots, as the Seeds also must with the Flowers of the Tuberoſe Lilly, Angelica, Iris; in odoriferous Fruits, as Oranges, Lemons, Citrons, &c. add the Rind of thoſe Fruits to the Flowers; and to the Flowers of Elder, Juniper, Lilly of the Valley, and Acacia, &c. add the Berries well moiſtened, whether green or dry is of no ſignification.

## ESSENCES.

### 118. *Method of extracting Effences from Flowers.*

PROCURE a Wooden-box lined with tin, that the Wood may not communicate any diſagreeable flavour to the Flowers, nor imbibe the Eſſence. Make ſeveral ſtraining frames to fit the Box, each about two inches

inches thick, and drive a number of hooks in them, on which fix a piece of callicoe stretched tight. The utmost care is requisite, to have the straining cloths perfectly clean and dry before they are used.

After having caused the callicoe to imbibe as much Oil of Ben as possible, squeeze them a little, then stretch them and fix them on the hooks of the frames, and put one frame thus compleated, at the bottom of the box, and upon its cloth strow equally those flowers, the essence of which you intend to extract, cover them with another frame, on the cloth of which you are to strow more flowers, and continue to act in the same manner till the box is quite filled. The frames being each about two inches thick, the flowers undergo very little pressure, though they

lye between the cloths. At the expiration of twelve hours, apply fresh flowers in the same manner, and continue so to do for some days. When you think the scent powerful enough, take the cloths from the frames, fold them in four, roll them up, and tie them tight with a piece of whip-cord, to prevent their stretching out too much, then put them into a press, and press out the oil. The press must be lined with tin, that the wood may not imbibe any part of the oil. Place underneath a very clean earthen or glass vessel to receive the essence, which is to be kept in bottles nicely corked. The essence of one kind of flower only, can be made in a box at the same time, for the scent of one would impair that of another. For the same reason, the cloths that have been used to extract the essence of any particular flower, cannot be used to extract the essence  
of.

of another, till washed clean in a strong lye, and thoroughly dried in the open air. This method is of great use to obtain the scent of flowers which afford no Essential Oil by distillation, such as Tuberoses, Jasmine, and several others..

119. *Or,*

TAKE any flowers you please, stratify them, that is to say, put them in a large jar layer by layer mixed with Salt, as directed for inflammable Spirit of Roses, till the jar is quite full; then cork it tight, and let it stand in a cellar or some other cool place forty days; at the expiration of which time, empty the whole into a sieve or straining cloth stretched over the mouth of a glazed earthen or stone pan, to receive the essence that drains from the flowers upon squeezing them gently; then put the essence into a glass bottle, which

must not be filled above two thirds full, cork it tight, and expose it to the heat of the sun in fine weather, five and twenty or thirty days, to purify the essence, a single drop of which will be capable of scenting a quart of Water or any other Liquor.

120. *Essence of Ambergrease.*

TAKE of Ambergrease a quarter of an ounce, the same quantity of Sugar Candy, Musk half a drachm, and Civet two grains, rub them together, and put the mixture into a Phial: pour upon it a quarter of a pint of tartarised Spirit of Wine, stop the Phial close, and set it in a slow gentle sand heat for four or five days, and then decant the clear Tincture for use. This makes the best of perfumes; the least touch of it leaves its scent upon any thing a prodigious time, and  
in

in constitutions where such sweets are not offensive to the head, nothing can be more immediately a Cordial.

121. *A Remedy for St. Anthony's Fire,  
or Erysipelatous Eruptions on the Face.*

TAKE Narcissus Roots, an ounce, fresh Nettle Seeds half an ounce, beat them together into a soft Paste with a sufficient quantity of White Wine Vinegar, and anoint the eruptions therewith every night; or, bathe the part affected with the Juice of Cresses.

FLOWERS.

122. *Manner of drying Flowers, so as  
to preserve their natural Colours.*

TAKE fine White Sand, wash it repeatedly, till it contains not the least earth  
or

or salt, then dry it for use. When thoroughly dry, fill a glass or stone jar half full of the Sand, stick the Stalk of the Flower in the Sand, place the Leaves, and Flower, in their natural situation, and afterwards cover them gently with the same Sand, about the eighth part of an inch above the Flower. Place the glass in the sun, or if in winter-time, in a room where a constant fire is kept, till the Flower is perfectly dried. Then remove the Sand with the utmost precaution, and clean the Leaves with a feather brush; particular Flowers lose in some measure their natural lively colours, but this may be helped by the assistance of art.

Roses and other Flowers of as delicate a colour, recover their natural lustre by being exposed to a moderate vapour of Brimstone; Crimson or Scarlet Flowers,  
by

by being exposed to the vapour of a solution of Tin in Spirit of Nitre. The vapour of a solution of Filings of Steel in Spirit of Vitriol, restores to the Leaves and Stalk, their primitive green colour. This method succeeds perfectly well in single Flowers. There are some difficulties with respect to Pinks, Carnations, and other double Flowers; to succeed with them, split the cup on each side, and when the Flower is quite dry, glue it together with Gum-water; or prick the cup in different parts with a large pin.

As to the scent, which is in great measure lost in drying, it may be restored, by dropping into the middle of the Flower a drop of its Essential Oil; for instance, a drop of Oil of Roses on a Rose, Oil of Cloves on a Clove-july-flower, Oil of Jasmine on a Jasmine Flower.

123. *A Secret to preserve Flowers.*

FILL an earthen, copper, or wooden vessel half full of sifted Sand, then fill it up to the brim with clear Spring Water, and stir the Sand well with a stick, in order to detach the earthy particles. When the Sand has thoroughly settled itself, pour off the turbid Water by inclination, add fresh Water, and continue to wash the Sand, till all the Water that floats on its surface, remains perfectly clear and transparent. The Sand being thus perfectly cleansed, expose it to the heat of the sun a sufficient length of time, to exhale entirely its humidity. Prepare for every Flower an earthen or tin vessel of a proper size, make choice of the finest, most perfect, and driest Flowers of their respective kinds, and be careful to leave the stalks of a good length. Place  
them

them with one hand as lightly as possible in the vessel upright, about two or three inches below the rims of the vessel, so as not to touch the sides, or each other, and with the other hand gradually pour on them the Sand till the stalk is quite covered, then lightly cover the Flower itself, separating the Leaves a little. The Tulip requires a farther operation. The triangular top that rises out of the middle of the cup, must be cut off, and thereby the Leaves of the Flower will adhere better to the Stalk. When the vessel is filled with flowers, leave it a month or two exposed to the rays of the sun, and the Flowers when taken out, though dry, will be very little inferior in beauty, to new blown Flowers, but will have lost their scent.

124. *Another Secret to preserve Flowers.*

TAKE the finest River Sand you can get, after having sifted it several times through a fine sieve, throw it into a glass vessel full of clear Water, and rub it a good while between your fingers to render it still finer ; then pour off the Water by inclination, and dry the Sand in the sun. The Sand being thus prepared, and thoroughly dried, bury the Flowers gently therein with their Leaves and Stalk, disposing them in such a manner that their form may not be in the least injured. After having kept the Flowers in this manner some time, till their humid particles are entirely evaporated, take them out, and inclose them in bottles well corked ; secure them from all changes of the atmosphere, but let them always enjoy a temperate warmth ;  
for

for if the heat is too great, the colours fade, and if not kept sufficiently warm, the humidity of the Flowers will not wholly evaporate.

125. *Another Method of preserving Flowers a long while, in their natural Shape and Colour.*

TAKE the finest River Sand, clean it as well as possible, by divesting it of whatever impurities it may contain, then dry it in the sun or a stove, sift it through a sieve, and only make use of the finest part. Procure a Tin Box, or a Wooden Box lined with Tin, of any size you think proper, cover the bottom of the Box three or four inches deep with prepared Sand, and stick therein the Stalks of the Flowers in rows, but in such a manner that none of the Flowers may touch

## 116 THE TOILET

touch each other, and fill the vacuities between the Stalks with Sand; then spread your Sand upon, within, and all round the Flowers, and cover the whole with a layer of Sand about two or three inches thick. Put this Box in a place exposed to the sun or in some warm situation for the space of a month. With respect to Tulips, the pistil that rises in the middle and contains the Seed, must be dexterously cut out, and the empty space filled with Sand: too many Flowers should not be put into the same Box, nor should the Box be too large.

## GLOVES.

126. *White Gloves scented with Jasmine  
after the Italian manner.*

TAKE half an ounce of White Wax, dissolve it over a gentle fire in two ounces of Oil of Ben. Dress your skins with this Liquid, dry them on lines, and clean them well with the purest water; when they are dried and properly stretched, make them up into gloves, which are to have the Jasmine Flowers applied to them eight days according to the usual method; then bring them into shape, and fold them smooth. This manner of working them up, communicates to the gloves the property of retaining the scent of the Flowers, much better than those that are dressed otherwise, and besides imparts to them  
the

## 118 THE TOILET

the virtue of preserving the hands and arms delicately soft and white.

### 127. *Gloves scented without Flowers.*

TAKE an ounce of Liquid Storax, an ounce of Rose-wood, the same quantity of Florentine Orrice, and half an ounce of Yellow Sanders. Beat the three last articles into a very fine powder, and add thereto the Storax and the earths that you use to dye your gloves, and a little Gum Arabic. Then take an equal quantity of Rose and Orange Flower Water, to temper this composition which you lay on your gloves; when they are dry, rub them well, and fold them up, then dress them afresh with a little Gum Water in which has been dissolved some powder of Florentine Orrice; hang them up to dry, and afterwards bring them into form, and fold them up as fit for use.

128. *White Gloves scented with Ketmia  
or Musk Seed.*

TAKE an ounce of Yellow Sanders, an ounce of Florentine Orrice, an ounce of Gum Benjamin, two ounces of Rose Wood, and a drachm of Storax ; reduce the whole to a fine powder, with as much Cerufs as you chuse ; mix them together with Rose-water, and dress your gloves with the mixture as neatly as you can for the first coat, then rub them well, and open them when they are thoroughly dry ; for the second coat use the same composition with the addition of a little Gum Arabic. For the third coat, levigate on a marble, eight grains of Ketmia Seed, four grains of Civet, a little Oil of Ben, and a very little Gum Tragacanth dissolved in Rose-water, add to this composition a quarter of a pint of Orange Flower

120 THE TOILET

Flower Water ; after having applied this third coat to your gloves, bring them into form, before they get thoroughly dry.

129. *To colour Gloves a curious French Yellow.*

TAKE Chalk and Wood Ashes, of each an equal quantity, make a strong Lye thereof, then strain off the clear Liquor and simmer it over the fire with a little Turmeric in powder, and a very little Saffron, till it becomes pretty thick, then set the liquor by to cool, and it is fit for use.

130. *An excellent Perfume for Gloves.*

TAKE Ambergrease a drachm, the same quantity of Civet, Orange-Flower Butter a quarter of an ounce, mix these ingredients well, and rub into the gloves with  
fine

fine Cotton Wool, and so press the perfume into them.

131. *Or,*

TAKE of Essence of Roses half an ounce, Oil of Cloves and Mace, of each a drachm, Frankincense a quarter of an ounce; mix them together, and lay them in papers between your gloves; and being hard pressed, the gloves will take the scent in twenty four hours, and scarcely ever lose it afterwards.

132. *An excellent Receipt to clear a tanned Complexion.*

AT night going to rest, bathe the face with the Juice of Strawberries, and let it lie on the part all night, and in the morning wash yourself with Chervil Water. The skin will soon become fair and smooth.

133. *Or,*

WASH yourself with the Mucilage of Linseeds, Fleawort, Gum Tragacanth, or Juice of Purslain mixed with the White of an Egg.

### BREATH.

134. *To sweeten the Breath.*

AT night going to bed, chew about the quantity of a small Nut of fine Myrrh.

135. *Or,*

CHEW every night and morning a Clove, a piece of Florentine Orrice-root about the size of a small bean, or the same quantity of Burnt Alum.

## OILS.

136. *A Cosmetic Oil.*

TAKE a quarter of a pint of Oil of Sweet Almonds fresh drawn, two ounces of Oil of Tartar per Deliquium, and four drops of Oil of Rhodium; mix the whole together, and make use of it to cleanse and soften the skin.

137. *Another Cosmetic Oil.*

TAKE a pint of Cream, infuse therein a few Water Lillies, Bean Flowers, and Roses; simmer the whole together in a vapour bath, and keep the Oil that proceeds therefrom for use in a vial, which is to be left for some time exposed to the evening dews.

138. *Oil of Wheat.*

This Oil is extracted by an Iron Press in the same manner as Oil of Almonds. It is excellent for Chaps in either the lips or hands, tetters eruptions, and rigidity of the skin.

139. *Compound Oil, or Essence of Fennel.*

TAKE five pints of the best French Brandy, and the same quantity of White-Wine, three quarters of a pound of bruised Fennel Seeds, and half an ounce of Liquorice Root sliced and bruised. Put the whole into an alembic, close the mouth with Parchment, and set it in an hot house, or in hot ashes, two whole days, then distill off the Liquor with a steady regular middling fire. What remains after the distillation of the Essence, and is called

called the White Drops, is only fit to wash the hands with.

140. *To make Oil of Tuberoses and  
Jasmine.*

BRUISE a little the Tuberoses or Jasmine Flowers in a marble mortar with a wooden pestle ; put them into a proper vessel with a sufficient quantity of Oil of Olives, and let them stand in the sun in a close stopped vessel twelve or fifteen days to infuse, at the expiration of which time, squeeze the Oil from the Flowers. Let the Oil stand in the sun to settle, then pour it clear off the dregs, and separate its humid particles; this Oil is very fragrant and well impregnated with the Essential Oil of these Flowers. Infuse a fresh parcel of Flowers newly gathered, in the same Oil, and proceed as before ; repeat this operation twelve or fourteen times, or even oftener if neces-

## 126 THE TOILET

fary, till the Oil is fully impregnated with the flavour of the Flowers. Some people use Oil of Ben instead of Sallad Oil, which in our opinion is preferable, being infinitely less apt to grow rancid. The Oils of Tuberoses, and Jasmine Flowers are of use for the Toilet on account of their fragrancy. There are cases in which they may be successfully used externally by way of friction, to comfort and strengthen the nerves, and brace up the fibres of the skin when too much relaxed.

### 141. *An Oil scented with Flowers for the Hair.*

SALLAD Oil, Oil of Sweet Almonds, and Oil of Nuts are the only ones made use of for scenting the hair.

Blanch

Blanch your Almonds in Hot Water, and when dry, reduce them to powder, sift them through a fine sieve, strow a thin bed of Almond powder, and a bed of Flowers over the bottom of a Box lined with Tin, and do this alternately till the Box is full, leave them together from morning till night; then throw away the Flowers, and add fresh ones in the same manner as before, and repeat the same operation every day for eight successive days. When the Almond powder is thoroughly impregnated with the scent of the Flower made choice of, put it into a new clean Linen Cloth, and with an Iron Press extract the Oil, which will be strongly scented with the fragrant perfume of the Flower.

ESSENTIAL OILS, OR  
QUINTESSENCES.

142. *Essential Oil, commonly called Quintessence of Lavender.*

FILL a cucurbit two thirds full with unwashed Lavender Flowers, pour upon them as much clear Water as will float about two inches above the Flowers. Fit to the cucurbit an head with a short neck and lute on to the refrigatory vessel. Distill in the common manner with a naked fire, of such a degree of strength as will cause the distilled Water to run off in a thick thread; the phlegm and spirit will come over in a considerable quantity, and the Essential Oil with which Lavender greatly abounds, will soon appear floating on the surface

surface of the Water in the receiver, which is to be separated according to the rules of art. As soon as you perceive that no more Oil drops into the receiver, which generally happens to be the case a good while before the phlegm is entirely drawn off, finish your distillation; and if you want a larger quantity of Quintessence, empty your still, put in a fresh quantity of Flowers, and add the phlegm and spirit drawn off by the former distillation instead of so much common Water, and distill as before, till you have obtained a sufficient quantity. This Quintessence possesses great medicinal virtues, and is particularly serviceable in vapourish and hysteric disorders.

143. *To make Essence of Cinnamon.*

TAKE half a pound of Cinnamon, reduce it in a mortar to an impalpable powder, put it into a very long necked matrafs, pour thereon as much highly rectified Spirit of Wine as will cover the powder about an inch. Cork the neck of the matrafs with a very sound cork coated with bees-wax, expose the matrafs to the sun for a whole month, observing to shake it well twice a day. At the expiration of the month, uncork the matrafs, using the utmost precaution not to disturb the sediment, gently incline the matrafs, and pour off the clear Tincture into a perfectly clean vial; the turbid part may be reserved for other purposes.

144. *To make Quintessence of Cloves.*

TAKE a pound of Cloves, beat them in a mortar, put them into a glass vessel, and pour on them a gallon of hot but not boiling water, cork the bottle close with a waxed cork, place it in a warm place, and let the cloves infuse therein three weeks or a month, then empty the contents of the bottle into a middling sized still, fit on a low head with a short neck, and distill in the common manner, with a naked fire of such a degree of fierceness as to make the distilled Water run off in a stream, resembling a thick thread; the Quintessence will come over with the Spirit mixed with a large quantity of Phlegm, but being heavier than either of those substances, will be found precipitated to the bottom of the receiver; you separate it in the usual

manner, and keep it for use in a vial closely corked. Then unlute your still, and throw in the spirituous Water that remains after the separation of the Quintessence ; distill it a second time, and you will obtain a small quantity more of the Quintessence which may be added to the former.

145. *A Cosmetic Juice.*

MAKE an hole in a Lemon, fill it with Sugar Candy, and close it nicely with leaf Gold applied over the Rind that was cut out ; then roast the Lemon in hot ashes. When desirous of using the Juice, squeeze out a little through the hole already made, and wash the face with a napkin wetted therewith. This Juice marvelously cleanses the skin, and brightens the complexion.

## VIRGINS MILK.

146. *A safe and approved Cosmetic.*

TAKE equal parts of Gum Benjamin, and Storax, dissolve in a sufficient quantity of Spirit of Wine, the spirit will then become a reddish Tincture and exhale a very fragrant smell; some people add a little Balm of Gilead; drop a few drops into a glass of clear Water, and by stirring, the Water will instantly change milky; Ladies use it successfully to clear the complexion, for which purpose nothing is better, or indeed so perfectly innocent and safe.

147. *Another, very easily made.*

BEAT a quantity of Houseleek in a marble mortar, squeeze out the Juice and  
clarify

## 134 THE TOILET

clarify it. When you want to use it, pour a few drops of rectified Spirit on the Juice, and it will instantly turn milky. It is a very efficacious remedy for a pimpled face, and preserves the skin soft and smooth.

### 148. *Another.*

TAKE an half gallon bottle, pour into it a quart of Spirit of Wine, and a pint of clear Brandy; then add a quarter of a pound of the finest Gum Benjamin, two ounces of Storax, half an ounce of Cinnamon, two drachms of Cloves, and a Nutmeg; bruise all these ingredients, and put them into the bottle to the Spirit, with four drops of Quintessence of Egyptian Kermia. Carefully cork the bottle, expose it to the sun a month, but take it in doors in rainy weather. At the month's end,  
gently

gently draw off the clear Tincture, and you will have a fragrant Virgins Milk, which is used by pouring a few drops on a wet napkin.

149. *A Liniment to destroy Vermin.*

TAKE an ounce of Vinegar, the same quantity of Stavesacre, half an ounce of Honey, and half an ounce of Sulphur; mix into the consistence of a soft liniment, with two ounces of Sallad Oil.

## LOTIONS.

150. *A Lotion to strengthen the Gums,  
and sweeten the Breath.*

TAKE Mountain Wine, and the distilled Water of Bramble Leaves, of each a pint, half an ounce of Cinnamon, a quarter

## 136 THE TOILET

ter of an ounce of Cloves, the same quantity of Seville Orange Peel, Gum Lacque and Burnt Alum, of each a drachm, all in fine powder; add thereto two ounces of Narbonne Honey. Put the whole into a glass bottle, and let the ingredients stand to infuse on hot ashes, the space of four days, on the fifth day squeeze the Liquor through a thick linen cloth, and preserve what passes through for use in a bottle well corked.

When the gums are relaxed, and want bracing, take a spoonful of this Liquid, and pour it into a glass; first use one half to rince the mouth, retain it there some time, then spirt it out, and take the remainder, and keep that also in the mouth some time, according as the gums are more or less relaxed, rub them at the same time with one of your fingers, and afterwards

wards rince the mouth with warm water; repeat the same operation every morning, or twice a day if occasion requires.

To render this remedy more efficacious, add to the whole quantity of the Lotion half a pint of Cinnamon Water distilled from White Wine.

The eastern nations, to procure a sweet breath, render the teeth beautifully White, and fasten the gums to the teeth, frequently chew boiled Chio Turpentine, or Gum Mastic. The Indians who live beyond the Ganges, chew it all day long, and are so used to this habit that they cannot without difficulty refrain therefrom.

The Spirituous Water of Guaiacum, possesses the property of giving ease in the tooth-ache, and fastening the teeth in their sockets,

## 138 THE TOILET

sockets; the mouth is to be gargled with a few drops mixed in a glass of clear Water.

151. *Another Lotion to fasten the Teeth and sweeten the Breath.*

POUR three pints of Water into an earthen or stone jar, dip therein four different times a red hot poker, and then immediately add an ounce of bruised Cinnamon, six grains of Burnt Alum, an ounce of powdered Pomegranate Bark, three ounces of Narbonne Honey, a quarter of a pint of Vulnerary Water, the same quantity of Rue Water, as much Roman Myrtle Water, and half a pint of Brandy. The whole being well mixed, tie a wet bladder over the mouth of the jar, and let it stand in the sun or any warm place, for twenty four hours; then strain  
off

off the Liquor through a thick linen cloth, or strong straining bag. To the strained Liquor, add two ounces of Spirit of Scurvy-Grass, and keep it in a bottle well corked for use. It is used in the same manner as the preceeding Lotion.

152. *An admirable Lotion for the Complexion.*

AFTER having washed the face with Soap and Water, wash yourself with the following lixivium. Take clear Lees prepared from Vine Ashes, and to every pound thereof, add an ounce of calcined Tartar, two drachms of Gum Sandarach, and as much Gum Juniper; let this Lotion dry on the face without wiping it off, and afterwards wash yourself with Imperial Water.

153. *An admirable Varnish for the Skin.*

TAKE equal parts of Lemon Juice, and Whites of new laid Eggs, beat them well together in a glazed earthen pan, which put on a slow fire, and keep the mixture constantly stirring about with a wooden spatula, till it has acquired the consistence of soft butter, keep it for use, and at the time of applying it, add a few drops of any Essence you like best. Before the face is rubbed with this varnish, it will be proper to wash with the distilled Water of Rice; this is one of the best methods of rendering the complexion fair, and the skin smooth, soft, and shining.

154. *A Liniment to destroy Nits.*

TAKE Oil of Bays, Oil of Sweet Almonds, and old Hogs Lard, of each two ounces,  
powdered

powdered Stavesacre, and Tanfy Juice, of each half an ounce, Aloes, and Myrrh, of each a quarter of an ounce, the smaller Centaury and Salt of Sulphur, of each a drachm; mix the whole into a liniment. Before you use it, wash the hair with Vinegar.

155. *A Liniment to change the Beard  
and Hair black.*

TAKE Oil of Costus, and Oil of Myrrh, of each an ounce and an half, mix them well in a leaden mortar, add thereto Tar, the expressed Juice of Walnut Leaves, and Gum Labdanum, of each half an ounce, Gall Nuts in fine powder, and Black Lead, of each a drachm and an half, the same quantity of Frankincense, and a sufficient quantity of Mucilage of Gum Arabic prepared with a decoction of  
Gall

Gall Nuts. Apply it to the head and chin after being clean shaved.

156. *A Depilatory Liniment.*

TAKE a quarter of a pound of Quicklime, an ounce and an half of Orpiment, an ounce of Florentine Orrice, half an ounce of Sulphur, the same quantity of Nitre, and a pound or pint of a Lixivium made of Bean Stalk Ashes ; boil the whole to a proper consistence, which may be known by dipping a wet feather into it, it is boiled enough when the feathery part of the quill easily separates from the quill: then add half an ounce of Oil of Lavender, or any other aromatic Essence, and mix into a Liniment, with which if you rub the hair that grows on any part of the body, it will immediately drop off. When the hair is removed, foment the part with Oil of Sweet Almonds or Oil of Roses.

157. *Another.*

TAKE a quarter of a pound of Gum Ivy dissolved in Vinegar, a drachm of Orpiment, a drachm of Ant Eggs, and two drachms of Gum Arabic dissolved in Juice of Henbane, in which half an ounce of Quick-lime has been boiled. Make the whole into a liniment with a sufficient quantity of Fowls Grease, and apply a little to the part where you would wish to destroy the Hair, after being clean shaved.

158. *An excellent Lip-Salve.*

TAKE an ounce of Myrrh, as much Litharge in fine powder, four ounces of Honey, two ounces of Bees-Wax, and six ounces of Oil of Roses; mix them together over a slow fire. Gentry may add  
a few

a few drops of Oil of Rhodium, and some Leaf Gold.

159. Or,

TAKE Bole Armeniac, Myrrh, and Cerufs in fine powder, of each an ounce; mix with a sufficient quantity of Goose-Grease into a proper consistence; it presently cures chaps in any part of the body.

160. *A Liniment to promote the Growth and Regeneration of the Nails.*

TAKE two drachms of Orpiment, a drachm of Manna, the same quantity of Aloes and Frankincense, and six drachms of White Wax. Apply this liniment to the nail, confine it on the part with a thumbstall, and prevent the air from getting admission, for nothing hinders the regeneration of the nails so much as air.

## NAILS.

161. *A certain Remedy for Whitloes; a Disorder that frequently affects the Nails.*

TAKE Pellitory of the Wall, cut as small as possible, and mix it with a proportionable Quantity of Hogs-lard; wrap it up in several papers, one over the other, and place it in warm ashes, which though not hot enough to burn the paper, yet retain sufficient heat to roast the Pellitory of the Wall, and incorporate it thoroughly with the Lard. Then spread this Liniment on a piece of brown paper, wrap it round the Whitloe, and apply a fresh dressing at least twice a day. That it may give the speedier relief, spread the ointment thick.

162. *Another.*

TAKE Vine Ashes, make a strong Lye, heat it very hot, pour it into a proper vessel, dip the affected finger therein as hot as you can bear it, and let it lie soaking in the Liquor a good while. To keep up an equal degree of warmth, every minute pour into the vessel a little more hot lees; repeat this operation two or three times, and you will speedily find the good effect of it.

## PERFUMES.

163. *Scented Tablets or Pastils.*

BEAT into a fine powder, and sift thro' an hair sieve, a pound of the Marc or Residuum left in the still, after making Angelic Water, page 67; then put it into

a mortar, with an handful of fresh gathered Rose Leaves, and a small porringer full of Gum Tragacanth softened with Rose Water ; beat the whole together into a Paste, roll it out on a dresser with a rolling pin, and cut it into Lozenges with a knife.

To form scented Pastils, roll up bits of this Paste in your hand, each the length of a finger, in the shape of a cone, that is, the bottom broader than the top, that they may stand upright, and set them by to dry. These kind of Pastils are lighted in the same manner as a candle, burn entirely away, and exhale a fragrant smoak while burning.

164. *A pleasant Perfume.*

TAKE a drachm of Musk, four Cloves, four ounces of Lavender Seed, a drachm

H 2

and

and an half of Civet, and half a drachm of Ambergrease; heat your pestle and mortar and rub the Musk, Cloves, and Lavender Seeds together, with a lump of Loaf Sugar and a wine glass full of Angelic or Rose-water. Take an handful of powder, and incorporate it well with this mixture, then sift it through a sieve; add two or three pounds more powder or even a larger quantity, till the perfume is brought to a proper degree of strength. As to the Civet, put it on the end of an hot pestle, and rub it well with an handful of powder, and after having rubbed them together some time, add by little and little six pounds of powder, then sift the whole through an hair sieve to incorporate it with the other perfumed powder. The Ambergrease must be well rubbed in the mortar, and by degrees two pounds of powder, either white or grey, must  
be

be added to it, till the Ambergrease is thoroughly incorporated with the powder, then sift the powder through an hair sieve, and mix all the three powders together. Take a little White Leather Bag, the seams well sowed up with catgut or waxed thread, and keep this perfume therein, a little of which may be used to scent other powders either more or less according to your fancy.

165. *Common perfumed Powder.*

TAKE Florentine Orrice a pound, dried Rose Leaves a pound, Gum Benjamin two ounces, Storax an ounce, Yellow Sanders an ounce and an half, Cloves two drachms, and a little Lemon Peel; reduce the whole to a fine powder, and mix with it twenty pounds of Starch, or rather of grey or white powder, incorporate them

H 3

well,

well, and colour them as you like, then sift through a lawn sieve.

166. *A Cassolette.*

INCORPORATE the Powders of Florentine Orrice, Storax, Benjamin and other aromatics, with Orange Flower Water, put this Paste into a little Silver or Copper Box lined with Tin. When you have a mind to use this perfume, set the Box on a gentle fire or on hot ashes, and it will exhale a most delightful odour.

167. *To perfume an whole House, and purify the Air.*

TAKE a root of Angelica, dry it in an oven or before the fire, then bruise it well and infuse it four or five days in White Wine Vinegar. To make use of it, heat a brick red hot, and lay the Angelica Root  
upon

upon the brick, the vapour that exhales therefrom is a powerful corrector of putrid air. The operation must be repeated several times.

168. *A Perfume to scent Powder.*

TAKE a drachm of Musk, four ounces of Lavender Seeds, a drachm and an half of Civet, and half a drachm of Ambergrease. Beat the whole together into powder, and sift through an hair sieve; keep this perfume in a box that shuts very close, to scent powder with, according to your fancy.

PASTILS.

169. *An excellent Composition to perfume a Room agreeably.*

TAKE four ounces of Gum Benjamin, two ounces of Storax, and a quarter of

H 4

an

an ounce of Aloes-wood ; boil these ingredients over a slow fire in a glazed earthen pipkin, with as much Rose-water as will cover the ingredients, which ought to be well bruised, about two thirds of an inch ; let them simmer together about half an hour, then strain off the Liquor for use. Dry the Residuum or Marc, and pulverize it in a warm mortar with a pound of Charcoal. Dissolve some Gum Tragacanth in the reserved Liquor, then add to your powder a drachm of fine Oriental Musk dissolved in a little Rose-water, and form the whole into a PASTE, of which make pastils about the length and thickness of the little finger, narrower at top than at bottom, that they may stand firm and upright ; and when they are thoroughly dry, light them at the narrow end, and let them burn till they are wholly consumed ; while burning they afford an exquisite perfume.

To

To render the perfume still higher, add six grains of Ambergrease.

170. *Or,*

PULVERIZE together two ounces of Gum Benjamin, half an ounce of Storax, a drachm of Aloes-wood, twenty grains of fine Civet, a little Sea Coal, and Loaf Sugar; boil the whole in a sufficient quantity of Rose-water, to the consistence of a stiff paste. If you are desirous of having your pastils higher flavoured, add twelve grains of Ambergrease just before you take the composition off the fire; and the ingredients being thoroughly mixed, form the paste into pastils.

171. *Fragrant Pastils made use of by way of Fumigation.*

TAKE the purest Labdanum and Gum Benjamin, of each two ounces, Storax and dry Balsam of Peru, of each three quarters of an ounce, choice Myrrh half a drachm, Gum Tacamahac a quarter of an ounce, Olibanum a drachm, Liquid Balsam of Peru half an ounce, Ambergrease a quarter of an ounce, Musk and Civet, of each a scruple, Essential Oil of Rhodium thirty drops, Essential Oils of Orange Flowers, Lemons, and Bergamot, of each four drops, Gum Lacque in fine powder two ounces and an half, Cascarilla, Aloeswood, Rose-wood, St. Lucia-wood, Yellow Sanders, and Cinnamon, all powdered, of each a drachm; form into a mass by the assistance of a vapour bath, and make into pastils the usual way.

172. *Pastils of Roses.*

PULVERIZE a pound of the Marc or Residuum left in the still after making Angelica Water, a large handful of Roses, and with a sufficient quantity of Gum Tragacanth dissolved in Rose-water, beat them into a stiff paste, which is to be rolled out upon a marble with a rolling pin, and cut into Lozenges, or formed into pastils; if you have a mind to ornament them, cover them with Leaf Gold or Silver.

## PASTES.

173. *Paste of dried Almonds to cleanse  
the Skin.*

BEAT any quantity you please, of Sweet and Bitter Almonds in a marble mortar,

H 6

and

## 156 THE TOILET

and while beating, pour on them a little Vinegar in a small stream to prevent their turning oily : then add two drachms of Storax in fine powder, two ounces of White Honey, and two Yolks of Eggs boiled hard ; mix the whole into a paste.

174. *Soft Almond Paste.*

BLANCH in warm Water any quantity of Bitter Almonds, leave them to grow dry, and then beat them in a marble mortar with a little Milk, to form them into a paste, and prevent their turning oily, afterwards add the Crumb of a light White Loaf soaked in Milk. Beat it with the Almonds till perfectly incorporated with them into an uniform mass, then put the whole into a kettle to simmer over a gentle fire, with some fresh Milk, and keep the composition constantly stirring to prevent  
its

its burning to, till it is boiled into a soft paste.

175. *Paste for the Hands.*

TAKE Sweet Almonds half a pound, White Wine Vinegar, Brandy, and Spring Water, of each two quarts, two ounces of Crumb of Bread, and the Yolks of two Eggs. Blanch and beat the Almonds, moistening them with the Vinegar, add the Crumb of Bread soaked in the Brandy, and mix it with the Almonds, and Yolks of Egg, by repeated Trituration. Then pour in the Water, and simmer the whole over a slow fire, keeping the composition continually stirring about, lest it should burn to, before it has acquired a proper consistence.

176. *Or,*

TAKE Bitter and Sweet Almonds blanched, of each two ounces, Pine-nuts, and the four Cold Seeds, of each an ounce; beat the whole together in a marble mortar with the Yolks of two Eggs, and the Crumb of a small Wheaten Loaf. Moisten the mass with White Wine Vinegar, put it into a deep pan, simmer it over a slow fire, and when the paste ceases sticking to the pan, it is sufficiently boiled.

177. *Or,*

TAKE blanched Almonds a pound, Pine-nuts four ounces, beat them together into a paste with the addition of two ounces of Loaf Sugar, an ounce of the finest Honey, the same quantity of Bean Flower, and  
I half

half a gill of Brandy. This paste may be scented with the Essences of Cloves, Lemons, Bergamot, Jasmine, Rhodium, Orange Flowers, &c. or with a few grains of Musk, Civet, or a few drops of Essence of Ambergrease, for persons who have no aversion to those perfumes.

178. Or,

BEAT half a pound of blanched Almonds, with half an ounce of Yellow Sanders, half an ounce of Florentine Orrice; and an ounce of Calamus Aromaticus, in fine powder, pour thereon by little and little, an ounce of Rose-water, and then add half a Pippin sliced small, a quarter of a pound of stale Crumb of White Bread sifted fine, and knead the whole into a paste with two ounces of Gum Tragacanth dissolved in Rose-water.

## 160 THE TOILET

179. *Or,*

BEAT some peeled Apples, having first taken out the Cores, in a marble mortar, with Rose-water, and White Wine, of each equal parts; add thereto some Crumb of Bread, blanched Almonds, and a little White Soap, simmer the whole over a slow fire till it acquires a proper consistence.

180. *Or,*

INFUSE two or three hours in Goats or Cows Milk some blanched Almonds, beat into a paste; strain the infusion through a linen cloth with a strong pressure, add to the strained Liquor half a pound of the Crumb of White Bread, a quarter of a pound of Borax, and as much Burnt Roch.

Roch Alum, simmer the whole together, and when almost boiled enough put in an ounce of Sperma Ceti ; stir the composition well with a spatula to prevent it from burning to the bottom of the pan, and let it simmer but very gently.

181. Or,

DRY before the fire half a pound of Bitter Almonds blanched, then beat them in a marble mortar as fine as possible, add a little boiled Milk to prevent the Almonds from turning oily ; beat in the same manner, the Crumb of two French Bricks with four Yolks of Eggs boiled hard, and with the addition of some fresh Milk knead into a paste, which mix with your Almond Paste, and thoroughly incorporate them together with the addition of a little more Milk, to render the whole of the consistence of a soft paste.

## POMATUMS.

182. *Cold Cream, or Pomatum for the  
Complexion.*

TAKE White Wax and Sperma Ceti, of each a drachm ; Oil of Sweet Almonds two ounces ; Spring Water an ounce and an half ; melt the Wax and Sperma Ceti together in the Oil of Almonds, in a glazed earthen pipkin, over hot ashes, or in a vapour bath ; pour the solution into a marble mortar, and stir it about with a wooden pestle, till it grows cold, and seems quite smooth, then mix in the Water by little and little, and keep stirring the mixture, till the Water is thoroughly incorporated. This pomatum becomes extremely white and light by the agitation,  
and

and very much resembles cream, from its similitude to which it has obtained its name.

This pomatum is an excellent cosmetic, it admirably nourishes the skin, renders it supple and smooth, and causes the wrinkles to disappear that proceed from its dryness. Some add a little Balm of Gilead to heighten its virtue, and it is sometimes scented, by using Rose-water or Orange Flower-water in the preparation instead of Spring-water, or with a few drops of any Essence as fancy directs. It is also very good to prevent marks in the face from the Small-Pox, in which last case, a little powder of Saffron, or some desiccative powder, such as Flowers of Zinc or French Chalk, is usually added. Keep it for use in a large gally-pot tied over with a bladder.

183. *Cucumber Pomatum.*

TAKE Hogs-lard a pound, ripe Melons, and Cucumbers, of each three pounds, Verjuice half a pint, two Pippins pared, and a pint of Cows Milk. Slice the Melons, Cucumbers, and Apples, having first pared them; bruise them in the Verjuice, and together with the Milk and Hogs-lard put them into an alembic, and let them stand to infuse in a vapour bath eight or ten hours; then squeeze out the Liquor through a straining cloth while the mixture is hot; expose the pomatum to the cold air, or set it in a cool place to congeal, then pour off the watery part that subsides; and wash it in several Waters, till the last remains perfectly transparent. Melt the pomatum again in a vapour bath several times, to separate from it all its humid parti-

particles, and every extraneous substance, or else it will soon grow rancid: Keep it for use in a gally pot tied over with a bladder.

184. *Or,*

A MORE simple Cucumber pomatum may be made by simmering together Hogslard and pared Cucumbers cut in thin slices: with respect to the rest of the process, follow the same method as laid down for preparing lip salve. Keep this pomatum in the same manner as the former.

Both these pomatums are good Cosmetics, they soften the skin, and preserve it cool and smooth.

185. *Lavender Pomatum.*

TAKE two pounds and an half of Hogslard, ten pounds of Lavender Flowers,  
and

and a quarter of a pound of Virgins Wax; put two pounds of picked Lavender Flowers into a proper vessel with the two pounds and an half of Hogs-lard, and knead them with your hands into as uniform a paste as possible. Put this mixture into a pewter, tin, or stone pot, and cork it tight; place the vessel in a vapour bath, and let it stand therein six hours; at the expiration of which time, strain the mixture through a coarse linen cloth, with the assistance of a press: throw away the Lavender Flowers as useless, pour the melted Lard back into the same pot, and add four pounds of fresh Lavender Flowers; stir the Lard and Flowers together while the Lard is in a liquid state, in order to mix them thoroughly, and repeat the first process: continue to act in this manner till the whole

whole quantity of Lavender Flowers is used. Then set in a cool place the pomatum separated from the Lavender Flowers, that it may congeal; pour off the reddish brown liquor, the aqueous juice extracted from the Lavender Flowers; wash the Pomatum in several waters, stirring it about with a wooden spatula, to separate any remaining watery particles, till the last water remains perfectly colourless.

Afterwards melt the Pomatum in a vapour bath, and let it stand therein about an hour in a vessel well corked, then leave it in the vessel to congeal; repeat this last operation till the aqueous particles are entirely extracted, when the Wax must be added, and the Pomatum melted a last time in a vapour bath, in a vessel closely corked, and suffered to congeal as before. When properly prepared, fill it into gally-pots,  
and

## 168 THE TOILET

and tye the mouths over with wet bladders, to prevent the air from penetrating.

In the same manner are prepared, Orange-Flower Pomatum, Jasmine Pomatum, and all Pomatums made of odorous flowers. Common Pomatum scented with the essences of any such flowers, may be used as a good succedaneum.

This Pomatum is extremely fragrant, but is only used for dressing the hair.

## 186. LIP-SALVES.

TAKE three ounces of Oil of Almonds, three quarters of an ounce of Spermaceti, and a quarter of an ounce of Virgins Wax; melt them together over a slow fire, with a little Alkanet Root; keep stirring till cold, and then add a few drops of Oil of Rhodium.

187. *Or,*

TAKE prepared Tutty and Oil of Eggs, of each equal parts; and rub the lips therewith after washing them with Barley or Plantain Water.

188. *Or,*

PLACE over a chafing dish of coals, in a glazed earthen pan, a quarter of a pound of the best fresh Butter, and an ounce of Virgin's Wax, melt them together; when thoroughly melted, throw in the Stones of half a bunch of ripe Black Grapes, and some Alkanet Roots a little bruised, and simmer these ingredients together the space of a quarter of an hour; afterwards strain the mixture thro' a fine linen cloth, and pour into your pomatum, which must be

## 170 THE TOILET

set on the fire again, a spoonful of Orange Flower-water, and having let them simmer together a little while, take the pan off the fire, and keep the pomatum stirring about till it is quite cold. It will keep good a long while, and is a perfect cure for chapped lips.

### 189. *A Yellow Lip Salve.*

TAKE Yellow Bees Wax two ounces and an half, Oil of Sweet Almonds a quarter of a pint, melt the Wax in the Oil, and let the mixture stand to cool, when cold it acquires a pretty stiff consistence. Scrape it lightly with a spatula, and it will grow much softer; what you scrape off, put into a marble mortar, and when you have scraped away the whole, rub it in the mortar with a wooden pestle, to make it perfectly smooth, and remove the  
infinity

infinity of little lumps that proceed from its having been scraped too roughly. Keep it for use in a gally-pot closely covered.

It is emollient and lenient; of course good for chaps in the lips, hands, or nipples, and to preserve the skin soft and smooth.

A Crust of Bread applied hot, is an efficacious remedy for pimples that rise on the lips, in consequence of having drank out of a glass after an uncleanly person.

190. *A Scarlet Lip Salve.*

TAKE Hogs-lard washed in Rose-water half a pound, Red Roses and Damask Roses bruised a quarter of a pound, knead them together, and let them lie in that state two days; then melt the Hogs-lard,

and strain it from the Roses; add a fresh quantity of Roses, knead them in the Hogs-lard, and let them lie together two days as before, then gently simmer the mixture in a vapour bath; press out the Lard, and keep it for use in the same manner as other Lip falves.

191. *Or,*

TAKE an ounce of Oil of Sweet Almonds cold drawn, and a drachm of fresh Mutton Suet, add a little bruised Alkanet Root, and simmer the whole together: instead of Oil of Sweet Almonds you may use Oil of Jasmine, or the Oil of any other Flower, if you chuse the Lip salve should have a fragrant scent.

192. *Or,*

TAKE Oil of Violets, and the expressed Juice of Mallows, of each an ounce and an half, Goose Grease and Veal Marrow, of each a quarter of an ounce, Gum Tragacanth a drachm and an half; melt the whole over a gentle fire.

193. *Or,*

TAKE half a pound of fresh Butter, a quarter of a pound of Bees Wax, four or five ounces of cleansed Black Grapes, and about an ounce of bruised Alkanet Root; simmer them together over a slow fire till the Wax is wholly dissolved, and the mixture becomes of a bright red colour, then strain it, and set it by for use.

194. *Or,*

TAKE Deer or Goats Suet six ounces, Hogs-lard four ounces, cut them into little bits, and wash them five or six different times in White Wine, then by hard pressure squeeze out every drop of the Wine; melt the fats in a new glazed earthen pan with half an ounce of Orrice Roots cut in thin slices, a grated Nutmeg, two or three Pippins pared and sliced thin, a pint of Rose-water, an ounce of Bees Wax, and half an ounce of bruised Cloves; simmer the whole over a slow fire about half an hour: then strain through a linen cloth into a pan half full of clean Water. Let the pomatum remain in the pan till cold, then wash it well, and beat it in a marble mortar with two ounces of White Wax till thoroughly incorporated therewith.

Apply

Apply a little to the lips every night going to rest, and rub it upon the hands every night and morning.

195. *White Pomatum.*

TAKE an ounce of Florentine Orrice Root, half an ounce of Calamus Aromaticus, and as much Gum Benjamin, a quarter of an ounce of Rose-wood, and a quarter of an ounce of Cloves. Bruise the whole into a gross powder, tie it up in a piece of linen, and simmer it in a vapour bath, with two pounds and an half of Hogs-lard well washed; add thereto a couple of Pippins pared and cut into small bits, four ounces of Rose-water, and two ounces of Orange Flower-water. After the ingredients have simmered together a little while, strain off the Liquor gently, and let the Pomatum stand till cold, then

176 THE TOILET

put it by for use in the same manner as other pomatums.

196. *Red Pomatum.*

Is made by adding to the above white pomatum, more or less Alkanet Root bruised, according to the depth of colour you would wish to impart to the pomatum, simmer the Pomatum and Alkanet together, stirring the mixture with a wooden spatula, till the Pomatum is sufficiently tinged, then strain it from the Roots, and set it by for use.

197. *A Pomatum to remove Redness, or Pimples in the Face.*

STEEP in clear Water a pound of a Boars Cheek till it becomes tolerably white, drain it quite dry before you put it into  
a new

a new glazed earthen pan with two or three pared Pippins quartered, an ounce and an half of the four Cold Seeds bruised, and a slice of Veal about the size of the palm of one's hand. Boil the whole together in a vapour bath for four hours, then with a strong cloth squeeze out your pomatum into an earthen dish placed upon hot ashes, adding thereto an ounce of White Wax and an ounce of Oil of Sweet Almonds, stir the pomatum about well with a spatula till cold.

198. *A Pomatum for Wrinkles.*

TAKE Juice of White Lilly Roots and Narbonne Honey, of each two ounces, melted White Wax an ounce ; incorporate the whole together, and form thereof a pomatum. It should be applied every night, and not be wiped off till the next morning.

199. *Another for the same Intention.*

TAKE six new laid Eggs, boil them hard, take out the Yolks, and fill the cavities with Myrrh, and powdered Sugar Candy, of each equal parts; join the Whites together neatly, and set them on a plate before the fire, and mix the Liquor that exsudes from the Whites of Eggs with an ounce of Hogs-lard. This pomatum must be applied in the morning, be suffered to dry into the skin, and then the residue wiped off with a clean fine napkin.

200. *Or,*

TAKE half an ounce of Sallad Oil, an ounce of Oil of Tartar, half an ounce of Mucilage of Quince Seeds, three quarters

ters of an ounce of Cerufs, thirty grains of Borax, and the same quantity of Sal Gem ; stir the whole together for some time in a little earthen dish, with a wooden spatula, and apply it in the same manner as the former composition.

201. *Pomatum for a red or pimpled Face.*

TAKE two pared Apples, Celery, and Fennel, of each an handful, and Barley Meal a quarter of an ounce, simmer the whole together a quarter of an hour in a gill of Rose-water, then add an ounce of fine Barley Meal, the Whites of four new laid Eggs, and an ounce of Deer's Suet, strain through a canvas bag into a dish that contains a little Rose-water, wash the pomatum well in the Rose-water, and then beat it in a mortar perfectly smooth. This

pomatum is to be applied as often as possible, to remove redness of the face, pimples, and even freckles, but to answer this last purpose must be continued till they are entirely effaced ; to prevent their return, the person must avoid the intense heat of the sun, and hot drying winds for some time.

202. *Pomatum to clear and preserve the  
Complexion.*

It must be made in the month of May : to prepare it, take a pound of rich fresh Butter, put it into a large earthen pan, and expose it to the sun, or place it in a room on which the sun shines most part of the day, and where it cannot gather any dirt ; when the Butter is thoroughly melted, pour thereon some Plantain-water, and mix them well together with a wooden spatula ;

spatula ; when the sun has exhaled the Water, put in more, and stir it about with the Butter five or six times a day, and continue to act thus, till the Butter becomes as white as snow ; if the sun happens not to give sufficient heat in May to effect this, you must continue the operation in June till the intention is perfectly answered. During the last two or three days, add Rose-water or Orange Flower-water, to give the pomatum an agreeable scent. It is an excellent application, and will keep a great many years without growing rancid.

It is to be used to the face and hands every night, and the hands are to be wiped dry with a new hempen towel.

203. *Another.*

TAKE three or four dozen of Sheep's Trotters, two or three days before the full of the moon, (this circumstance seems of no consequence) strip off all the flesh and break the bones, which simmer in Rose-water, or White Wine, when River-water can't be procured, for a quarter of an hour in a new glazed pan, then strain off the Liquor through a linen cloth into a pan that contains half a pint of Rose-water. Leave the strained Liquor to cool, and when quite cold, skim off the fat from the Water with a spoon; then wash it five or six times with fresh Rose-water, and beat it in a marble mortar till it is perfectly white and smooth; now incorporate with it a third part of its weight of Oil of the four Cold Seeds extracted by pressure

pressure without fire, and the whole being well mixed, put this pomatum into a very clean gally-pot, and pour thereon a small quantity of any odoriferous Water, or for want of such, common Water, and change the Water frequently.

This pomatum should be used two or three times in a week. With regard to the flesh that you strip off the bones of the Trotters, boil it in the same manner as you did the bones, and it will afford a small quantity of fat, which must be treated in the same manner as that extracted from the bones, and is of equal value.

204. *A Pomatum for the Skin.*

TAKE Oil of White Poppy Seeds, and  
of the four Cold Seeds, of each a gill,  
Sperma

Spema Ceti three quarters of an ounce, White Wax an ounce; mix them into a pomatum according to the rules of art. A great quantity of a substance resembling Butter is extracted from the Cocoa Tree, which is excellent to mollify and nourish the skin, and has long been used for this purpose amongst the Spanish Creolian women.

205. *Pomatum to make the Hair grow on a Bald Part, and thicken the Hair.*

TAKE Hens Fat, Oil of Hempseed, and Honey, of each a quarter of a pound; melt them together in an earthen pipkin, and keep the mixture stirring till cold, with a wooden spatula; when cold it is fit for use. This pomatum, to obtain the desired effect, must be rubbed on the part eight days successively.

206. *Another Pomatum for the Hair.*

CUT into small pieces a reasonable quantity of an Hogs-cheek, steep it eight or ten days in clean Water, which be careful to change three times a day, and every time the Water is changed, stir it well with a spatula to make the flesh white. Drain the flesh dry, and put it into a new earthen pipkin, with a pint of Rose-water, and a Lemon stuck with Cloves, and simmer over the fire till the scum looks reddish, then skim it off, remove the pipkin from the fire and strain the Liquor; which let stand till cold, then skim off the fat, beat it well with cold Water, and change the Water two or three times as occasion may require, the last time use Rose-water instead of common Water, drain the Pomatum dry, and scent it with Violets, Tuberoses,  
Orange

186 THE TOILET

Orange Flowers, Jasmine, Jonquils a la Reine, &c. in the following manner.

207. *Manner of scenting Pomatums for the Hair.*

SPREAD your pomatum about an inch thick upon several dishes or plates, on one dish strew the Flowers you make choice of, and cover them with another. Change the Flowers for fresh ones every twelve hours, and continue to pursue this method for ten or twelve days, mixing the pomatum well, and spreading it out afresh every time fresh Flowers are added. It will soon acquire a fragrant scent, and may be [ used in what manner you think proper. It is good for every purpose almost, but more particularly for the hair, which it nourishes, strengthens, preserves, and thickens.

208. *Orange Flower Pomatum.*

TAKE two pounds and an half of Hogslard, and three pounds of Orange Flowers; mix them together in a marble mortar; then put the mixture into an earthen vessel with some Water, and place it in a vapour bath, where let it stand till the Lard is melted and floats above the Flowers. When it has stood till cold, pour away the Water, and simmer in the same manner as before, with three pounds of fresh Orange Flowers; repeat the same operation twice more with two pounds of Orange Flowers each time, and the last time, while the mixture stands in infusion, add a gill of Orange Flower-water. Strain through an hair sieve held over an earthen dish, drain off the Water thoroughly when cold, and keep in a dry place in a gally-pot closely

closely tied over with a bladder, till wanted.

In the same manner are prepared Jasmine, Jonquil, Tuberoſe, Lavender Pomatums, and all pomatums ſcented with Flowers.

209. *Sultana Pomatum.*

THIS pomatum is made of Balfam of Mecca, Sperma Ceti, and Oil of Sweet Almonds cold drawn. It clears and preſerves the complexion, and is of uſe for red pimpled faces.

210. *A Sweet ſmelling Perfume.*

TAKE a pound of freſh gathered Orange Flowers, half a pound of common Roſes, half a pound of Lavender Seeds, half a pound

pound of Musk Roses, a quarter of a pound of Sweet Marjoram Leaves, a quarter of a pound of Clove-july-flowers picked, three ounces of Thyme, two ounces of Myrtle Leaves, two ounces of Melilot Stalks stripped of their Leaves, an ounce of Rosemary Leaves, an ounce of Cloves bruised, and half an ounce of Bay Leaves.

These ingredients mixed all together in a large pan covered over with parchment, if exposed to the heat of the sun during the whole summer season, for the first month stirred about every other day with a stick, and taken in doors in rainy weather, will towards the end of the summer produce an excellent composition to perfume little bags, by adding thereto, in order to heighten its fragrancy, a little  
scented

190 THE TOILET

scented Cypress-powder, mixed with coarse Violet-powder.

211. *Another, for the same Purpose.*

TAKE of Orange Flowers a pound, common Roses picked without the Yellow Pedicles, a pound, Clove-july-flowers picked and the White End of their Leaves cut off, half a pound, Marjoram, and Myrtle Leaves picked, of each half a pound, Musk Roses, Thyme, Lavender, Rosemary, Sage, Chamomile, Melilot, Hyssop, Sweet Basil, and Balm, of each two ounces ; fifteen or twenty Bay Leaves, two or three handfuls of Jasmine, as many little Green Oranges, and half a pound of Salt. Put the whole in a proper vessel, and leave them together a whole month, carefully observing to stir the mixture well

well twice a day with a wooden spatula or spoon.

At the month's end, add twelve ounces of Florentine Orrice Root in fine powder, and the same quantity of powdered Benjamin, Cloves, and Cinnamon finely powdered, of each two ounces, Mace, Storax, Calamus Aromaticus, all in fine powder, and Cypress-powder, of each an ounce, Yellow Sanders and Cyperus or Sweet Flag, of each three quarters of an ounce; mix the whole thoroughly, by stirring the mixture a good while according to the foregoing directions, and you will have a very fragrant perfume.

## POWDERS.

212. *Tooth Powder.*

TAKE prepared Pumice Stone, Sealed Earth, and prepared red Coral, of each an ounce; Dragons-Blood half an ounce, Cream of Tartar an ounce and an half, Cinnamon a quarter of an ounce, and Cloves a scruple; beat the whole together into a powder.

This powder serves to cleanse, whiten, and preserve the teeth, and prevents the accidents that arise from the collection of Tartar or any other foulness about them. It is used with a little brush, or a prepared root wetted with spring water, in order to make the powder stick, which is to be rubbed on the teeth, washing the mouth afterwards

afterwards with a little Vulnerary Water diluted with Spring-water. By taking this care to keep the teeth clean, the tooth-ache, fluxions on the teeth, and most other disorders incident to the teeth and mouth, which for the most part owe their origin to a want of cleanliness, are certainly prevented.

213. *A Red Tooth Powder.*

TAKE Florentine Orrice Root, Cream of Tartar, and Burnt-Allum, of each an ounce; Cloves, Nutmegs, Dragons-Blood, and red Coral prepared, of each a quarter of an ounce; mix the whole together, and reduce to a fine powder.

214. *Another.*

TAKE Sage Leaves and Red Roses, of each two large pinches; Orrice Roots half

K

an

194 THE TOILET

an ounce, Guaiacum Wood three drachms, Rose Wood a drachm, Gum Mastic three drachms, Myrrh and Cinnamon of each a drachm, Pumice Stone and Red Coral prepared of each six drachms, Red Sanders half an ounce; mix and reduce to a fine powder.

With the addition of a little Honey, or Syrup of dried Red Roses, it makes an incomparable Opiate.

215. *Or,*

TAKE Rosemary Branches, burn them to Ashes, and throw the Ashes fiery hot into Vinegar of Roses; let them steep therein four and twenty hours, then dry them in the sun, and beat them into a fine powder, with which rub your teeth as  
often

often as occasion requires. Tobacco Ashes also whiten the teeth.

216. *Or,*

TAKE Rose-water, Syrup of dried Red Roses, clarified Honey, and Plantain-water, of each half an ounce, Spirit of Vitriol a quarter of an ounce; mix the whole together, and rub the teeth with a linen rag wetted in this Liqueur, and afterwards rinse the mouth with Rose or Plantain Water.

217. *Or,*

INFUSE two ounces of Pellitory of Spain, half an ounce of Alkanet Root, and six Cloves in a quart of Spirit of Wine, for a fortnight or three weeks, then decant off the clear Tincture. Gargle the mouth

## 196 THE TOILET

with ten or twelve drops of this tincture diluted in a wine glass of water.

218. *Orange Flower Powder.*

PUT half a pound of Orange Flowers, into a box that contains twelve pounds and an half of powdered Starch; mix them well with the Starch, and stir the mixture about at least twice in the day, to prevent the Flowers from heating. At the expiration of twenty four hours, remove the old flowers, and mix with the Starch the same quantity of fresh Orange Flowers; continue acting in this manner for three days together, and if you think the perfume not sufficiently strong, add fresh Flowers once or twice more. The box must be kept close shut, as well after as during the operation, and the foregoing proportions and cautions must be observed

observed for any larger quantity; you may make as much as you please at a time.

219. *Jonquil Powder.*

EITHER single or double Jonquils may be used: Take, as before directed, Starch Powder and Jonquil Flowers in the foregoing proportions, strew the Flowers higgledy-piggledy among the Powder, and at the expiration of twenty hours, sift the Powder through a coarse sieve, throw away the Flowers, and add the same quantity of fresh Flowers to the Powder, and continue this method four or five days, observing never to touch the Powder while the Flowers lie mixed with it, and the Powder will acquire a very agreeable perfume.

## 198 THE TOILET

In the same manner are prepared, Hyacinth, Musk Rose, and Damask Rose Powders, &c.

### 220. *Coarse Violet Powder.*

BEAT separately into coarse Powder the following ingredients, viz. half a pound of dried Orange Flowers, a quarter of a pound of dried Lemon-peel, a quarter of a pound of Yellow Sanders, a quarter of a pound of dried Musk Roses, a quarter of a pound of Gum Benjamin, three ounces of dried Lavender Tops, two ounces of Rose Wood, two ounces of Calamus Aromaticus, two ounces of Sweet Flag, two ounces of Storax, an ounce of Sweet-Marjoram, half an ounce of Cloves, two pounds of Florentine Orrice Root, and a pound of dried Provence Roses; mix the whole together. When you want to fill  
bags

bags with this powder, rub a drachm of Musk and half a drachm of Civet, with a little Mucilage of Gum Tragacanth made with Angelic Water, and a little Sweet-scented Water, and rub the inside of the bag over with this composition, before you fill it with the Violet Powder.

221. *Another Coarse Violet Powder.*

Mix together a pound of Florentine Orrice Roots, half a pound of dried Orange Flowers, a quarter of a pound of yellow Sanders, two ounces of Coriander Seeds, two ounces of the Marc or Residuum left after making the Angelic Water, two ounces of Sweet Flag, an ounce and an half of Calamus Aromaticus, and an ounce of Cloves; bruise the whole into a coarse Powder, and keep it for use in a jar close stopped.

222. *Jasmine Powder.*

POWDER French Chalk, sift it through a fine sieve, put it in a box, and strew thereon a quantity of Jasmine Flowers; shut down the lid close, and add fresh Flowers every four and twenty hours; when the Powder is well impregnated with the scent of Jasmine, rub together a few grains of Civet, Ambergrease, and a little white Sugar Candy, and mix with the Powder.

223. *Ambrette Powder.*

TAKE six ounces of Bean Flour, and the same quantity of worm-eaten Wood, four ounces of Cyperus Wood, two ounces of Yellow Sanders, two ounces of Gum Benjamin, an ounce and an half of Storax,

rax, a quarter of an ounce of Calamus Aromaticus, and as much Labdanum; beat the whole into a very fine powder, and sift it through a lawn sieve. Add four grains of Ambergrease, and half an ounce of Mahaleb or Musk Seeds; mix them with the rest of the powder, and keep the whole in a bottle close stopped for use. You may put any quantity you please of this Perfume into common powder, to give it an agreeable flavour.

224. *Cyperus Powder.*

FILL a linen bag with Oak Moss, steep it in water, change the water frequently, and afterwards dry the Moss in the sun; beat it to powder, and sprinkle it with Rose-water; then dry it again, sift it thro' a fine sieve, and mix with it a small quantity of any of the preceding powders.

225. *Another Cyperus Powder more fragrant.*

WASH Oak-Moss several times in fair water and dry it thoroughly, then sprinkle over it Orange Flower and Rose-water, and spread it thin upon a hurdle to dry, and place under it a chafing-dish, in which burn some Storax and Benjamin; repeat this operation till the Moss becomes well perfumed, then beat it to fine powder, and to every pound add a quarter of an ounce of Musk and as much Civet.

226. *Perfumed Powder.*

TAKE a pound of Florentine Orrice Root, two ounces of Gum Benjamin, a pound of dried Roses, an ounce of Storax, an ounce and an half of Yellow Sanders, a quarter of an ounce of Cloves, and a  
small

small quantity of Lemon-peel; beat the whole together into fine powder, and then add twenty pounds of Starch-powder. Sift through a lawn sieve; and colour this powder according to your fancy.

227. *The White Powder that enters into the Composition of the Delightful Perfume.*

TAKE a pound of Florentine Orrice Root, twelve Scuttle-fish Bones, eight pounds of Starch, and an handful of Sheep or Bullocks bones calcined to whiteness; beat the whole into a powder, and sift it through a fine hair sieve.

228. *Prepared Powder.*

POUR a quart of Brandy, or an ounce of highly rectified Spirit of Wine, on a pound or a pound and an half of Starch, mix them together; then dry the Starch,

K 6

beat

beat it to powder, and sift it through a fine lawn sieve ; if you please you may add a little powder of Florentine Orrice Root.

229. *A Powder to nourish the Hair.*

TAKE Roots of the Sweet Flag, Calamus Aromaticus, and Red Roses dried, of each an ounce and an half ; Gum Benjamin an ounce, Aloes Wood three quarters of an ounce, Red Coral prepared and Amber prepared of each half an ounce, Bean-flour a quarter of a pound, Florentine Orrice Roots half a pound ; mix the whole together, then beat into a fine powder, and add thereto five grains of Musk, and the same quantity of Civet. This powder greatly promotes the regeneration of the hair, and strengthens and nourishes its roots. The property of enlivening the imagination, and helping the memory is also attributed to this composition.

230. *Common Powder.*

THE best Starch dried is generally the basis of all Hair Powders; sometimes, worm-eaten or rotten Wood, dried Bones, or Bones calcined to whiteness, which are sifted through a fine hair sieve after they have been beaten to powder. This kind of Powder readily takes any scent, particularly that of Florentine Orrice, a root which naturally possesses a violet smell. Of these Roots, the whitest and foundest are made choice of; they are to be powdered as fine as possible, and this can only be done during the summer season.

231. *White Powder.*

TAKE four pounds of Starch, half a pound of Florentine Orrice Root, six Scuttle-fish Bones, Ox Bones and Sheeps Bones.

Bones calcined to whiteness, of each half an handful ; beat the whole together, and sift the powder through a very fine sieve.

232. *Grey Powder.*

To the Residuum of the preceeding Powder add a little Starch and Wood Ashes in fine powder ; rub them together in a mortar some time, and then sift through a fine hair sieve.

233. *Another.*

TAKE the Marc or Residuum of the White Powder, mix therewith a little Starch, Yellow Oker, and Wood Ashes or Bakers Coals to colour it ; beat the whole well in a mortar, then sift it thro' an hair sieve, beat the coarser parts over again, and sift a second time ; repeat these operations till all the composition has passed through the sieve.

234. *Flaxen coloured Powder.*

ADD to the White Powder, a very little Yellow Oker. The White Powder may be tinged of any colour, by adding ingredients of the colour you fancy.

235. *Bean Flour.*

GRIND any quantity of Beans, and sift the Meal through a very fine lawn sieve. It will take no other scent than that of Florentine Orrice.

236. *To sweeten the Breath.*

To sweeten the Breath, roll up a little ball of Gum Tragacanth, scent it with some odoriferous Essence or Oil, and hold it in the mouth; a little Musk may be added to the ball while rolling up, where that perfume is not disagreeable.

237. Or,

AFTER having eat garlic or onions, chew a little raw Parsley ; it will infallibly take away their offensive smell.

238. *A Remedy for scorbutic Gums.*

BRUISE Cinquefoil in a marble mortar, squeeze out the Juice, warm it over the fire, and rub the Gums therewith every night and morning.

239. *A Remedy for an Ulcer or Impostume in the Nose.*

TAKE Juice of Mint one ounce, Juice of Rue two ounces ; mix them together, and snuff up a little two or three times in a day.

240. *Or,*

DRY Horehound Leaves, and use the Powder thereof in the same manner as snuff.

241. *Or,*

SNUFF up a decoction of Sweet-Marjoram, Calamint, Cloves, Ginger and Nutmegs, in Wine or Vinegar of Squills.

242. *A Remedy for moist Feet, &c.*

BE careful to keep the feet always washed clean, and frequently change your stockings and shoes. Take twenty pounds of a Lye made of the Ashes of the Bay-Tree, three handfuls of Bay Leaves, a handful of Sweet Flag, and the same quantity of Calamus Aromaticus, and Dittany of Crete; boil the whole together

210 THE TOILET

ther some time, then strain off the liquor, and add two quarts of Wine. Steep your feet in this bath an hour every day, and in a short time the feet will no longer exhale a disagreeable smell.

FLEAS.

243. *A certain Method of destroying Fleas.*

SPRINKLE the room with a decoction of Arsmart, Bitter Apple, Briar Leaves, or Cabbage Leaves; or smoak it with burnt Thyme or Pennyroyal.

244. *Or,*

PUT Tanfy Leaves about different parts of the bed, viz. under the matrafs or between the blankets.

245. Or,

RUB the bed posts well with a strong decoction of Elder Leaves.

246. Or,

MERCURIAL Ointment, Sulphur Vivum, a fumigation of Pennyroyal Leaves, or the fresh Leaves of that Plant tied up in a bag, and laid upon the bed, infallibly destroy Fleas.

## WRINKLES.

247. *A Secret to take away Wrinkles.*

HEAT an Iron Shovel red hot, throw thereon some Powder of Myrrh, receive the smoke on your face, covering the head with a napkin to collect the smoke,  
and

and prevent its being dissipated. Repeat this operation three times, then heat the Shovel again, and when fiery hot spirt on it a mouthful of White Wine. Receive the vapour of the Wine also on your face, and repeat it three times. Continue this proceeding every night and morning as long as you find occasion.

## C A R M I N E S.

248. *A Rouge for the Face.*

ALKANET Root strikes a beautiful red when mixed with Oils or Pomatums. A Scarlet or Rose coloured Ribband wetted with Water or Brandy, gives the Cheeks, if rubbed therewith, a beautiful bloom that can hardly be distinguished from the natural colour. Others only use a Red Sponge, which tinges the cheeks of a fine carnation colour.

249. *Another.*

TAKE Brazil Wood Shavings, and Roch Alum, beat them together into a coarse powder, and boil in a sufficient quantity of Red Wine, till two thirds of the Liquor are wasted away. When this decoction has stood till cold, rub a little on the cheeks with a bit of cotton.

250. *The Turkish Method of preparing  
Carmine.*

INFUSE three or four days in a large jar filled with White Wine Vinegar, a pound of Brazil Wood Shavings of Fernambuca, having first beaten them to a coarse powder; afterwards boil them together about half an hour, then strain off the Liquor through a coarse linen cloth, set it again  
upon

upon the fire, and having dissolved half a pound of Alum in White Wine Vinegar, mix both Liquors together, and stir the mixture well with a spatula. The scum that rises, is your Carmine, skim it off carefully, and dry it for use.

Carmine may also be made with Cochineal, or Red Sanders instead of Brazil Wood.

251. *A Liquid Rouge that exactly imitates Nature.*

TAKE a pint of good Brandy, and infuse therein half an ounce of Gum Benjamin, an ounce of Red Sanders, and half an ounce of Brazil Wood, both in coarse powder, with half an ounce of Roch Alum. Cork the bottle tight, shake it well every day, and at the expiration of twelve days  
the

the Liquor will be fit for use. Lightly touch the cheeks with this Tincture, and it will scarcely be possible to perceive that rouge has been laid on, it will so nearly resemble the natural bloom.

252. *An Oil that possesses the same Property.*

TAKE ten pounds of Sweet Almonds, an ounce of Red Sanders in powder, and an ounce of bruised Cloves ; pour thereon a gill of White Wine, and three quarters of a gill of Rose-water ; stir them well every day. At the end of eight or nine days, squeeze this paste in a press in the same manner as when you mean to extract Oil of Almonds.

## SWEET SCENTED BAGS.

253. *A Sweet scented Bag to wear in the Pocket.*

TAKE thin Persian, and make into little bags about four inches wide, in the form of an oblong square. Rub the inside lightly with a little Civet, then fill them with coarse powder a la Marechale, or any other odoriferous Powder you chuse, to which add a few Cloves, and a little Yellow Sanders beaten small, and sew up the mouths of the bags.

254. *Bags to scent Linen.*

TAKE Rose Leaves dried in the shade, Cloves beat to a gross powder, and Mace scraped; mix them together, and fill little bags with this composition.

255. *An agreeable Sweet scented Composition.*

TAKE Florentine Orrice a pound and an half, Rose Wood six ounces, Calamus Aromaticus half a pound, Yellow Sanders a quarter of a pound, Gum Benjamin five ounces, Cloves half an ounce, and Cinnamon an ounce ; beat the whole into powder, and fill your bags with it.

256. *Manner of making various Sorts of these little Bags or Sachets.*

FOR this purpose may be used different parts of the Aromatic Plants ; as Leaves of Southernwood, Dragon-wort, Balm, Mint both garden and wild, Dittany, Ground Ivy, Bay, Hyssop, Lovage, Sweet Marjoram, Origanum, Pennyroyal, Thyme,

L

Rose-

Rosemary, Savoury, Scordium, and Wild Thyme. The Flowers of the Orange, Lemon, Lime and Citron Tree, Saffron, Lavender, Roses, Lilly of the Valley, Clove-july-flower, Wall Flower, Jonquil, and Mace. Fruits, as Aniseeds, &c. The Rhinds of Lemons, Oranges, &c. Small green Oranges, Juniper-berries, Nutmegs, and Cloves. Roots of Acorus, Bohemian Angelica, Oriental Costus, Sweet Flag, Orrice, Zedoary, &c. The Woods of Rhodium, Juniper, Cassia, St. Lucia, Sanders, &c. Gums, as Frankincense, Myrrh, Storax, Benjamin, Labdanum, Ambergrease, and Amber. Barks, as Canella Alba, Cinnamon, &c.

Care must be taken that all these ingredients are perfectly dry, and kept in a dry place. To prevent their turning black, add a little common Salt. When you  
chuse

chuse to have any particular Flower predominant, a greater quantity of that plant must be used in proportion to the other ingredients.

## WASH BALLS.

257. *White Soap.*

THIS soap is made with one part of the Lees of Spanish Pot-ash and Quick-lime, to two parts of Oil of Olives or Oil of Almonds.

258. *Honey Soap.*

TAKE four ounces of White Soap, and as much Honey, half an ounce of Salt of Tartar, and two or three drachms of the distilled Water of Fumitory ; mix the whole together. This Soap cleanses the

L 2

skin

skin excellently well, and renders it delicately white and smooth. It is also used to good purpose, to efface the marks of burns and scalds.

259. *A perfumed Soap.*

TAKE four ounces of Marsh-mallow Roots skinned and dried in the shade, powder them, and add an ounce of Starch, the same quantity of Wheaten Flour, six drachms of fresh Pine-nut Kernels, two ounces of blanched Almonds, an ounce and an half of Orange Kernels husked, two ounces of Oil of Tartar, the same quantity of Oil of Sweet Almonds, and thirty grains of Musk: thoroughly incorporate the whole, and add to every ounce, half an ounce of Florentine Orrice Root in fine powder. Then steep half a pound of fresh Marsh-mallow Roots  
bruised

bruised in the distilled Water of Mallows, or Orange Flowers, for twelve hours, when forcibly squeeze out the Liquor, and with this Mucilage and the preceeding Powders and Oils, make a stiff Paste, which is to be dried in the shade, and formed into round balls. Nothing in the world exceeds this soap for smoothing the skin, or rendering the hands delicately white.

260. *Fine scented Washball.*

TAKE of the best White Soap, half a pound, and shave it into thin slices with a knife, then take two ounces and an half of Florentine Orrice, three quarters of an ounce of Calamus Aromaticus, and the same quantity of Elder Flowers, Cloves, and dried Rose Leaves, of each half an ounce, Coriander-seeds, Lavender and

L 3

Bay

Bay Leaves, of each a drachm, and three drachms of Storax. Reduce the whole to fine powder, and with the Soap knead into a PASTE, with the addition of a few grains of Musk or Ambergrease. When you make this PASTE into Washballs, soften it with a little Oil of Almonds to render the composition more lenient. Too much cannot be said in favour of this washball with regard to its cleansing and cosmetic property.

261. *A Washball, an excellent Cosmetic for the Face and Hands.*

TAKE a pound of Florentine Orrice, a quarter of a pound of Storax, two ounces of Yellow Sanders, half an ounce of Cloves, as much fine Cinnamon, a Nutmeg, and twelve grains of Ambergrease ; beat the whole into very fine powder,

der, and sift through a lawn sieve, except the Ambergrease, which is added afterwards; then take two pounds of the finest White Soap shaved small, and dissolve it in three pints of Brandy, it will be dissolved in four or five days, add a little Orange Flower-water, and knead the whole into a very stiff Paste with the best Starch finely powdered, when mix in the Ambergrease dissolved with a little Gum Tragacanth liquefied in Sweet scented Water: of this Paste make washballs, dry them in the shade, and polish them with a Paste-board or Lignum vitæ cup.

262. *Bologna Washballs.*

TAKE a pound of Italian Soap cut in small bits, and a quarter of a pound of Lime, pour thereon two quarts of Brandy,

L 4

let

let them ferment together twenty four hours, then spread the mass on a sheet of filtering paper to dry; when quite dry, beat it in a marble mortar, with half an ounce of St. Lucia Wood, an ounce and an half of Yellow Sanders, half an ounce of Orrice Root, and as much Calamus Aromaticus, all finely powdered. Knead into a Paste with Whites of Eggs, and a quarter of a pound of Gum Tragacanth dissolved in Rose-water, and then form into washballs according to the usual method.

263. *An excellent Washball for the  
Complexion.*

TAKE two ounces of Venetian Soap, dissolve in two ounces of Lemon Juice, an ounce of Oil of Bitter Almonds, and the same quantity of Oil of Tartar; mix  
the

the whole together, and stir the mixture till it acquires the consistence of a thick Paste.

264. *Seraglio Washballs.*

TAKE a pound of Florentine Orrice Roots, a quarter of a pound of Gum Benjamin, two ounces of Storax, two ounces of Yellow Sanders, half an ounce of Cloves, a drachm of Cinnamon, a little Lemon-peel, an ounce of St. Lucia Wood, and an whole Nutmeg. Reduce the whole to fine powder, then take about two pounds of White Soap shaved thin, steep it four or five days in three pints of Brandy together with the above powder; knead the whole with about a pint of Orange Flower-water, and form a Paste of this Soap with a sufficient quantity of Starch, and make into Washballs of any size you like, with the addition of Whites of Eggs and

## 226 THE TOILET

Gum Tragacanth dissolved in some odori-ferous Water. A few grains of Musk or Civet, a little Essential Oil of Lavender, Bergamot, Roses, Cloves, Clove-july-flowers, Jasmine, Cinnamon, in short, any that best pleases the fancy of the person who prepares these Washballs, may be incorporated with the Paste while forming into a mass.

### 265. *An Hepatic Salt, to preserve the Complexion.*

TAKE Roots of Agrimony two pounds, Roots of Succory and Scorzonera of each a pound, Bitter Costus and Turmeric of each half a pound, Calamus Aromaticus and Rhapontic of each a quarter of a pound, Wormwood, Southernwood, Sweet-Maudlin, Harts-tongue, Fluellin, Liverwort, Fumitory and Dodder of Thyme, of each three ounces; calcine the whole in a reverberatory furnace, then add Ashes  
of

of Rhubarb and Cassia Lignea of each an ounce and an half; make a lye with these Ashes in a decoction of the Flowers of Liverwort, and extract the Salt according to art. This Salt causes the bile to flow freely, removes obstructions, cures the jaundice, takes away a fallow complexion, and imparts to the skin the ruddy vermilion bloom of health. Its dose is from twenty-four to thirty-six grains, in any convenient vehicle.

### EYE-BROWS.

266. *To change the Eye-brows black.*

RUB them frequently with ripe Elderberries. Some use burnt Cork, or Cloves burnt in the candle; others prefer the Black of Frankincense, Rozin, and Mastic. This Black will not melt or come off through the persons sweat.

## MARKS OF THE SKIN.

267. *To efface Spots or Marks of the Mother, on any Part of the Body.*

STEEP in Vinegar of Roses, or strong White Wine Vinegar, Borrage Roots stripped of their small adhering fibres, and let them stand to infuse twelve or fourteen hours; bathe the part affected as frequently as possible with this Infusion, and in time the marks will totally disappear.

268. *Or,*

TAKE, towards the end of the month of May, the Roots and Leaves of the herb Bennet; distill them with a sufficient quantity of Water in an alembic, and frequently foment the marks with the distilled Water.

269. *To take away Marks, and fill up the Cavities left after the Small-Pox.*

TAKE Oil of the four larger Cold Seeds, Oil of Eggs, and Oil of Sweet Almonds, of each half an ounce, Plantain and Nightshade Water of each three quarters of an ounce, Litharge and Cerufs finely powdered and washed in Rose-water, of each a drachm ; put the Litharge and Cerufs into a brass pot, and incorporate them with the Oils over the fire, by adding the Oils by little and little, and stirring the mixture constantly ; then mix in by degrees also the Nightshade and Plantain Water, and thus form a Liniment, with which anoint the face of the patient as soon as the scabs of the Small-Pox begin to scale off, and repeat the application as occasion may require.

## COMPLEXION.

270. *Certain Methods to improve the Complexion.*

BROWN ladies should frequently bathe themselves, and wash their faces with a few drops of Spirit of Wine, sometimes with Virgins Milk, and the distilled Waters of Pimpernel, White Tansy, Bean Flowers, &c. These deterfive penetrating applications, by degrees remove the kind of varnish that covers the skin, and thus render perspiration more free, which is the only real cosmetic for the skin.

271. *The Montpellier Toilet.*

For this purpose a new light-woven linen cloth must be procured, and cut of a proper size to make a toilet ; the first  
step

step you take must be to wash the cloth perfectly clean in several different Waters, then spread it out to dry, and afterwards steep it twenty four hours in Sweet scented Water, viz. half Angelic, and half Rose-water; when you take the cloth out gently squeeze out the Water, and hang it up to dry in the open air, and when thoroughly dry, lay on it the following composition.

Take dried Orange Flowers, Roots of Elecampane, and Florentine Orrice, of each half a pound, four ounces of Yellow Sanders, two ounces of the Marc or Residium of Angelic Water, an ounce of Rose Wood, an ounce of Sweet Flag, half an ounce of Gum Labdanum, half an ounce of Cloves, half an ounce of Calamus Aromaticus, and a quarter of an ounce of Cinnamon; beat all these ingredients into powder, and make them into  
a Paste

a Paste with Mucilage of Gum Tragacanth dissolved in Angelic Water; rub this Paste hard on both sides of your cloth, on which leave the little bits of Paste that may stick thereto, because they render the surface more smooth. Afterwards hang the cloth up to dry, and when half dry, rub both sides again, to render the cloth smoother, with a sponge wetted with Angelic Water, after which dry it for the last time, and fold it up. This cloth is generally lined with taffety, and covered with sattin, and is never enclosed within more than two pieces of some kind of thin silk, as Taffety, &c.

272. *Sweet scented Troches to correct  
a bad Breath.*

TAKE Frankincense a scruple, Amber-  
grease fifteen grains, Musk seven grains,  
Oil of Lemons six drops, double refined  
Sugar

Sugar an ounce, and form into little Troches with Mucilage of Gum Arabic, made with Cinnamon Water. Hold one or two in the mouth as often as occasion requires.

273. *A curious Varnish for the Face.*

FILL into a bottle three quarters of a pint of good Brandy, infuse therein an ounce of Gum Sandarach, and half an ounce of Gum Benjamin, and frequently shake the bottle till the Gums are wholly dissolved, then let it stand to settle.

Apply this varnish after having washed the face clean, and it will give the skin the finest lustre imaginable.

## WARTS.

274. *A Medicine to cure Warts.*

TAKE the Leaves of Campanula, bruise them, and rub them upon the warts; repeat this operation three or four times, if they prove obstinate; they will waste away in a little time without leaving the least mark behind. This plant perhaps is not to be met with every where, but Botanists have described it by the following marks. Its leaves, say they, resemble those of the Blue Bell Flower, or Ivy, are stringy, composed of five lobes, without down, are small at the end, and have a loose flabby stalk.

275. *Another.*

TAKE the inner Rind of a Lemon, steep it four and twenty hours in distilled Vinegar,

gar, and apply it to the warts. It must not be left on the part above three hours at a time, and is to be applied afresh every day.

276. Or,

Cut in half a Red Onion, and rub the warts well with it.

277. *Another safe and experienced Method.*

Rub the warts with a pared Pippin, and a few days afterwards they will entirely waste away.

## VINEGARS.

278. *Distilled Vinegar.*

FILL a stone cucurbit about three parts and an half full of White Wine Vinegar,  
place

place the vessel in a furnace so contrived as to contain three parts of the height of the cucurbit, mould the openings that remain between the sides and the upper part of the vessel with clay tempered with water; lute the vessel, fix on a receiver, and begin your distillation with a moderate fire, which is to be increased by degrees, till about five sixths of the Vinegar are drawn off, which is called distilled Vinegar. A small quantity of acid Liquor still remains in the cucurbit of the consistence of Honey, which if you think proper may be dried hard by the assistance of a vapour bath. The Vinegar distilled from this substance is infinitely more acid, than that which was drawn off by the first process.

To rectify distilled Vinegar, put it into a clean vessel, set it in the same degree  
of

of fire as at first to separate more phlegm, and in every thing proceed as before, till the bottom is almost dry, the fire nor distillation however must not be urged too far, for fear of giving an empyreumatic flavour to that which is already distilled.

Distilled Vinegar is used externally mixed with Water to wash the face : it is cooling, and takes away the troublesome little pimples that sometimes affect this part.

279. *Distilled Lavender Vinegar.*

Put into a stone cucurbit any quantity of fresh gathered Lavender Flowers picked clean from the Stalks, pour thereon as much distilled Vinegar as is requisite to make the Flowers float ; distill in a vapour bath, and draw off about three fourths of the Vinegar ; this is what is called distilled Lavender Vinegar.

## 238 THE TOILET

In the same manner are prepared the Vinegars from all other Vegetable substances. Compound Vinegars are made by mixing several aromatic substances together; observing only to bruise all hard woody ingredients, and to let them infuse a sufficient length of time in the Vinegar before you proceed to distillation.

Lavender Vinegar is of use for the Toilet; it is cooling, and if the face is washed with it, it gives a firmness to and braces up the fibres of the skin, when too much relaxed.

### 280. *Vinegar of the Four Thieves.*

TAKE of the tops of Sea and Roman Wormwood, Rosemary, Sage, Mint and Rue, of each an ounce and an half, Lavender Flowers two ounces, Calamus Aromaticus,

maticus, Cinnamon, Cloves, Nutmeg and Garlic, of each a quarter of an ounce, Camphor half an ounce, Red Wine Vinegar a gallon. Chuse all the foregoing ingredients dry, except the Garlic and Camphor; beat them into gross powder, and cut the Garlic into thin slices; put the whole into a matras, pour the Vinegar thereon, and digest the mixture in the sun, or in a gentle sand heat, for three weeks or a month, then strain off the Vinegar by expression, filter it through filtering paper, and now add the Camphor dissolved in a little rectified Spirit of Wine. Keep it for use in a bottle tight corked.

The Vinegar of the Four Thieves is antipestilential; it is used successfully as a preservative against contagious disorders. The hands and face are washed with it  
every

every day; the room fumigated with it, as also the clothes that are worn, in order to secure the person from infection.

## E Y E S.

281. *To cure watery Eyes.*

PREPARE a decoction with the Leaves of Betony, Fennel Roots, and a little fine Frankincense, which use as an Eye-water.

282. *Or,*

FREQUENTLY bathe the Eyes with a decoction of Chervil.

283. *Or,*

DROP into the Eyes now and then a little Juice of Rue mixed with clarified Honey.

284. *An excellent Optthalmic Lotion.*

TAKE White Vitriol and Bay Salt, of each an ounce; decrepitate them together, when the detonation is over, pour thereon, in an earthen pan, a pint of boiling Water or Rose Water; stir them together, and let them stand some hours: a variously coloured skin will be formed on the surface, which carefully skim off, and put the clear liquor into a bottle for use.

This was communicated to the author as a great secret; and indeed he has found it by experience very safely to cool and repel those sharp humours that sometimes fall upon the Eyes, and to clear them of beginning films and specks. If too sharp, it may be diluted with a little Rose-water.

285. *An Optbalmic Pultice.*

TAKE half a pint of Alum Curd, and mix therewith a sufficient quantity of Red Rose Leaves powdered to give it a proper consistence. This is an excellent application for sore moist eyes, and excellently cools and represses defluxions on the organ of sight.

286. *A Pultice for inflamed Eyes.*

TAKE half a pint of a decoction of Linseeds in Water, and as much Flour of Linseed as is sufficient to make it of a proper consistence. This pultice is preferable to a Bread and Milk Pultice for inflamed Eyes, as it will not grow sour and acrid.

287. *Sir Hans Sloane's Eye Salve.*

TAKE prepared Tutty one ounce, prepared Bloodstone two scruples, Aloes in fine powder twelve grains ; mix them well together in a marble mortar with as much Viper's Fat as is requisite to bring the whole to the consistence of a soft salve. It is to be applied with an hair pencil, the eyes winking or a little opened ; it has cured many whose eyes were covered with opake films and scabs left by preceding disorders of the eyes.

288. *An Ophthalmic Fomentation.*

TAKE three quarters of an ounce of White Poppy Heads bruised with their Seeds, and boil them in Milk and Water, of each half a pint, till one half is wasted

M 2

away,

244 THE TOILET

away, then dissolve in the strained Liquor a scruple of Sugar of Lead. An excellent application for moist, or inflamed Eyes.

289. *A simple Remedy to strengthen the Sight.*

SNUFF up the Juice of Eyebright, and drop a little into the eyes. It not only clears and strengthens the sight, but takes off all specks, films, mists, or suffusions.

Herb Snuffs are also excellent to strengthen and preserve the sight; various Receipts for making which may be seen in pages 271, 272.

## SUPPLEMENT.

Manner of taking out all Kinds of SPOTS and STAINS from LINEN and STUFFS; and various other useful Receipts.

290. *To take Iron Mould out of Linen.*

HOLD the Iron Mould over the Fume of Boiling Water for some time, then pour on the spot a little Juice of Sorrel and a little Salt, and when the cloth has thoroughly imbibed the Juice, wash it in Lye.

291. *To take out Stains of Oil.*

TAKE Windsor Soap shaved thin, put it into a bottle half full of Lye, throw in the size of a Nut of Sal Armoniac, a little Cabbage Juice, two Yolks of new laid Eggs, and Ox-gall discretionally, and lastly

an ounce of powdered Tartar: then cork the bottle, and expose it to the heat of the noon-day sun for four days: The Liquor is then fit for use, and is to be poured on the stains and well rubbed in on both sides of the cloth, then wash the stains with clear Water, or rather with the following soap, and when the cloth is dry, the stains will no longer appear.

292. *Scowering Balls.*

TAKE soft soap, or Fullers-earth; mix and incorporate it with Vine Ashes sifted through a fine sieve, and with powdered Chalk, Alum and Tartar, of each equal parts, form into balls, which dry in the shade. Their use is to rub on spots and stains, washing the spotted part afterwards in clear Water.

293. *To take out Stains of Coomb.*

PUT Butter on the stain, and rub it well with a piece of brown paper laid on an heated silver spoon, then wash the whole

whole together in the same manner as directed for spots of Wax.

294. *To take out Stains of Urine.*

WASH the stained place well with boiled Urine, and afterwards wash it in clear Water.

295. *To take out Stains on Cloth of whatever Colour.*

TAKE half a pound of Honey, the size of a Nut of Salt Armoniac, and the Yolk of an Egg; mix them together, and put a little of this mixture on the stain, and leave it thereon till dry, then wash the cloth with fair Water, and the stains will disappear. Water impregnated with mineral Alkaline Salt or Soda, Ox-gall, and Black Soap, is also very good to take out spots of grease.

296. *To take out Spots of Ink.*

As soon as the accident happens, wet the place with Juice of Sorrel, or Lemon

M 4

Juice,

248 THE TOILET

Juice, or with Vinegar, and the best hard White Soap.

297. *To take out Spots of Pitch and Turpentine.*

POUR a good deal of Sallad Oil on the stained place, and let it dry thereon four and twenty hours, then with the Scowring Ball No. 292, and Warm Water, take away the spot by rubbing it on the inside of the cloth.

298. *To take out Spots of Oil on Satin and other Stuffs, and even on Paper.*

If the spot is not of long standing, take the Ashes of Sheeps Trotters calcined, and apply them hot both under and upon the spot, lay thereon something heavy, and let it remain all night, and if in the morning the spot is not entirely effaced, renew the application repeatedly till the spot wholly disappears.

299. *To take out Spots on Silk.*

RUB the spots with Spirit of Turpentine; this Spirit exhaling, carries off with it the Oil that causes the Spot.

300. *Balls to take out Stains.*

TAKE an ounce of Quick-lime, half a pound of Soap, and a quarter of a pound of White Clay, moisten the whole with Water, and make into little balls, with which rub the stains, and afterwards wash them with fair water.

301. *To clean Gold and Silver Lace.*

TAKE the Gall of an Ox and of a Pike, mix them well together in fair Water, and rub the gold or silver with this mixture, it will soon recover its former lustre.

302. *To restore to Tapestry its original Lustre.*

SHAKE well and thoroughly clean the tapestry, then take an hard brush, and rub off the chalk which you had before rubbed on the tapestry, it having remained thereon about seven or eight hours; then chalk the tapestry a second time, and after it has remained on it the same time as at first, brush it off again; then beat your tapestry well with a stick to get out all the dust, shake it well, and clean it nicely with a brush, and it will resume its primitive lustre.

303. *To clean Turkey Carpets.*

To revive the colour of a Turkey Carpet, beat it well with a stick, till the dust is all got out, then with Lemon Juice or Sorrel Juice take out the spots of ink, if the carpet is stained with any, wash it  
in

in cold Water, and afterwards shake out all the Water from the threads of the carpet, and when it is thoroughly dry, rub it all over with the Crumb of an hot White Loaf, and if the weather is very fine, hang it out in the open air a night or two.

304. *To refresh Tapestry Carpets, Hangings, or Chairs.*

BEAT the dust out of them on a dry day as clean as possible; then brush them well with a dry brush, and make a good lather of Castile or the best Windsor Soap, and rub them well over with an hard brush; then take fair Water, wash off the froth, and with Alum Water wash them well, and you will find when dry, most of the colours restored; those that are yet too faint, touch up with a pencil dipped in suitable colours; and indeed you may run over the whole piece in the same manner with water colours,

M 6 mixed.

mixed with weak gum water, and it will cause the tapestry, &c. if well done, to look at a distance like new.

305. *To take Wax out of Silk or Camblet.*

TAKE Soft Soap, rub it well on the spots of wax, dry it in the sun till it grows very hot, then wash the spotted part with cold Water, and the wax will be entirely taken out.

306. *To take Wax out of Velvet of all Colours except Crimson.*

TAKE a Crummy Wheaten Loaf, cut it in two, toast it before the fire, and while very hot, apply it to the part spotted with wax, and when it has taken its effect, apply another piece of toasted Bread hot as before, and continue to repeat this application till the wax is entirely taken out.

307. *To wash Gold or Silver Work on Linen, or any other Stuff, so as to look like new.*

TAKE a pound of Ox-gall; Honey and Soap, of each three ounces; Florentine Orrice in fine powder three ounces; mix the whole in a glass vessel into a Paste, and expose it to the sun during ten days; then make a decoction of Bran, and strain it clear. Afterwards plaister over with your bitter Paste, the places you want to clean, and wash the Paste off with the Bran-water, till it is no longer tinged. Then wipe with a clean linen cloth the places you have washed, and cover them with a clean napkin, dry them in the sun, press and glaze, and the work will look as well as when new.

308. *To take Spots out of Silken or Wool-  
len Stuffs.*

TAKE a sufficient quantity of the finest Starch, wet it in an earthen pipkin with Brandy, rub a little on the spots, let it dry thereon, and then brush it off; repeat this operation till the spots are wholly taken out. You must be careful to well beat and brush the place on which the Starch was applied.

309. *To take Stains of Oil out of Cloth.*

TAKE Oil of Tartar, pour a little on the spot, immediately wash the place with warm Water, and then two or three times with cold Water, and the spot will entirely disappear.

310. *To take Stains out of White Cloth.*

BOIL an ounce of Alum in a gallon and an half of Water, for half an hour,  
then

then add a piece of White Soap, and half an ounce more of Alum, and after it has stood in cold infusion two days, wash with this mixture stains in any kind of white cloth.

311. *To take Stains out of Crimson Velvet, and coloured Velvets.*

TAKE a quart of strong Lye made with Vine Ashes, dissolve therein half an ounce of Alum, and when the mixture has settled, strain it through a linen cloth; then take half a drachm of soft Soap, and the same quantity of Castile Soap, a drachm of Alum, half a drachm of Crude Salt Armoniac, a scruple of common Salt, a little Loaf Sugar, Juice of Celandine, and the Gall of a Calf; mix the whole well, and then strain off the Liquor for use. When you want to use it, take a little Brazil-wood Shavings with some Scarlet Flocks, boil them in this Liquor, and when strained off, it will be very good to  
take

take spots or stains out of crimson velvet or cloth: for velvets or cloths of other colours, you dye your Liquor of the proper colour, by boiling in it some Flocks of the same colour as the cloth you intend to clean.

312. *A Soap that takes out all manner of Spots and Stains.*

TAKE the Yolks of six Eggs, half a table spoonful of bruised Salt, and a pound of Venetian Soap; mix the whole together with the Juice of Beet-roots, and form into round balls, that are to be dried in the shade. The method of using this Soap, is to wet with fair Water the stained part of the cloth, and rub both sides of the cloth well with this Soap, then wash the cloth in Water, and the stain will no longer appear.

313. *Another Method to take Spots or Stains out of White Silk or Crimson Velvet.*

FIRST soak the place well with Brandy or Spirit of Wine, then cover it over with and rub in the White of a new laid Egg, and dry it in the sun: now wash it briskly in cold Water, rubbing the particular place where the spot is, hard between the fingers; repeat this operation a second and even a third time, if it has not perfectly succeeded the first or second time; and you are sure of success.

314. *A Receipt to clean Gloves without wetting.*

LAY the Gloves upon a clean board, and mix together Fullers Earth and Powder of Allum very dry, and pass them over on both sides with a moderately stiff brush then sweep off the Powder, and sprinkle them well with Bran and Whiting, and  
dust

dust them thoroughly ; if not very greasy, this will render them as clean as when new : but if they are extremely greasy, rub them with stale Crumb of Bread, and Powder of burnt Bones, then pass them over with a woollen Cloth dipped in Fullers Earth or Allum Powder.

315. *To colour Gloves.*

If you want to colour them of a dark colour, take Spanish Brown and Black Earth ; if lighter, Yellow Ochre and Whiting, and so of the rest ; mix the colour with Size of a moderate strength, then wet the Gloves over with the Colour, and hang them to dry gradually ; beat out the superfluous Colour, and smooth them over with a sleeking stick, and reduce them to a proper size.

316. *To wash Point Lace.*

DRAW the Lace pretty straight in a frame, then with a lather of Castile Soap  
pretty

pretty warm, rub the Lace over gently by means of a fine brush ; and when you perceive it clean on one side, turn it, and rub the other side in the same manner ; then throw over the Lace some Allum-water to take off the Suds, and with some thin Starch go over the wrong side of the Lace, and on the same side iron it when dry, and with a bodkin raise the flowers.

317. *To clean Point Lace without washing.*

Fix the lace in a frame, and rub it with stale Crumb of Bread, and when clean, dust out the Crumbs.

318. *To wash black and white Sarcenet.*

LAY the silk smooth upon a board, spread a little Soap over the dirty places, make a lather with Castile Soap, and with a pretty fine brush dipped therein, pass over the silk the right way, viz. lengthways, and continue so to do till that side is sufficiently

ficiently scowered; then turn the silk and scower the other side in the same manner, and put the silk into boiling Water, where it must lie some time; then rince it in thin Gum-water; if white silk, add a little Smalt: this done, fold the silk, clapping or pressing out the water with your hands on a dry Carpet, till it becomes tolerably dry; if white, dry it over the Smoak of Brimstone till ready for smoothing, which is to be done on the right side with a moderately hot Iron.

319. *A Soap to take out all Kinds of Stains.*

Boil an handful of Strawberries or Strawberry Leaves, in a quart of Water and a pint of Vinegar, add two pounds of Castile Soap, and half a pound of Chalk in fine powder, boil together till the water has evaporated, and when you use it, wet the place with the sharpest Vinegar or Verjuice, and rub it over with this Soap; dry it afterwards before the fire or in the sun.

320. *An expeditious Method to take Stains out of Scarlet, or Velvet of any other Colour.*

TAKE Soapwort, when bruised strain out its Juice, and add thereto a small quantity of black Soap; wash the Stain with this Liquor, suffering it to dry between whites; and by this means, in a day or two the Spots will disappear.

### DIFFERENT WAYS OF PREPARING SNUFF.

321. *Method of making Snuff.*

FIRST strip off the Stalks and large fibres of the Tobacco, then spread the Leaves on a mat or carpet to dry in the sun, afterwards rub them in a mortar, and sift the powder through a coarse or fine sieve according to the degree of fineness  
you

## 262 THE TOILET

you would have your snuff; or grind the Tobacco Leaves, prepared according to the foregoing directions, in a snuff-mill, either into a gross or fine powder, according as you press close or ease the millstone..

### 322. *Method of cleansing Snuff in order to scent it.*

Fix a very strong thick linen cloth in a little tub that has an hole in the bottom stopped with a plug that can easily be taken out to let the water run off when wanted; this cloth must cover the whole inside of the tub, and be fastened all round the rim: put your Snuff in it, and pour Water thereon; when it has been steeped twenty-four hours, let the Water run out, and pour on fresh; repeat this operation three times, if you would have the Snuff thoroughly cleansed, and every time squeeze the Snuff hard in the cloth, to discharge the water entirely from it; then place your Snuff on an ozier hurdle covered with

with a thick linen cloth, and let it dry in the sun; when it is thoroughly dry, put it again into the tub, with a sufficient quantity of Angelic, Orange Flower, or Rose Water. At the expiration of twenty-four hours take the Snuff out of the water, and dry it as before, frequently stirring the Snuff about while drying, and sprinkling it with the same sweet scented Water as was used at first. The whole of this preparation is absolutely necessary to render Snuff fit to receive the scent of Flowers.

If the Snuff is not required to be of a very excellent quality, and you are unwilling to waste more of it than can possibly be avoided, wash it only once, and cleanse it imperfectly. This purgation may the better suffice, if while drying in the sun, you take care to knead the Snuff into a cake several times, and often sprinkle it with some sweet scented Water.

323. *Method of scenting Snuff.*

THE Flowers that most readily communicate their flavour to Snuff are Orange Flowers, Jasmine, Musk Roses, and Tuberoses. You must procure a box lined with dry white paper, strow your Snuff over the bottom about the thickness of an inch, strow thereon a thin layer of Flowers, then another layer of Snuff, and continue to lay your Flowers and Snuff alternately in this manner, until the box is full. After they have lain together four and twenty hours, sift your Snuff through a sieve to separate it from the Flowers, which are to be thrown away, and fresh ones applied in their room in the former method; continue to do this till the Snuff is sufficiently scented, when fill it into a canister, which keep close stopped.

324. *Or,*

PUT your Flowers that are placed over each layer of the Snuff, between two pieces  
of

of white paper pricked full of holes with a large pin, and sift through a sieve the Snuff that may happen to get between the papers. To scent the Snuff perfectly it is necessary to renew the Flowers four or five times. This method is the least troublesome of the two.

A very agreeable scented Snuff may be made with Roses, by taking Rose-buds, and stripping off the green cup, and pistil that rises in the middle, and fixing in its place a Clove, being careful not to separate the Leaves that are closed together. These Rose-buds prepared as above, are to be exposed to the heat of the sun a whole month, inclosed in a glass well stopped, and are then fit for use.

To make Snuff scented with a thousand Flowers, take a number of different Flowers, and mix them together, proportioning the quantity of each Flower, to the degree of its perfumed scent, so that the flavour

N of

## 266 THE TOILET

of no one particular Flower may be predominant.

### 325. *Perfumed Snuff.*

TAKE a little Snuff, rub it in your hands with a little Civet, open the body of the Civet still more by rubbing it in your hands with fresh Snuff, and when you have mixed it perfectly with the Snuff, put the Snuff into a canister. Snuff is flavoured with other perfumes in the same way.

### 326. *Or,*

PERFUME your Snuff by heating an iron or brass mortar, and while it retains the heat, rubbing therein about twenty grains of Ambergrease, adding by little and little a pound of Snuff, which is to be well mixed with the hands.

### 327. *Snuff after the Maltese Fashion.*

PERFUME with Ambergrease, in the manner already described, some Snuff previously scented with Orange Flowers.  
Then

Then grind in a mortar a little Sugar with about ten grains of Civet, and mix by little and little with about a pound of the foregoing Snuff.

328. *The Genuine Maltese Snuff.*

TAKE Roots of Liquorice, and Roots of the Rose-bush, peel off their outer skin, dry them, powder them, and sift the powder through a fine sieve, then scent them according to your fancy, or in the same manner as French Snuff, adding a little White Wine, Brandy, or a very little Spirit of Wine, and rubbing the Snuff well between your hands. This, the reader may be assured, is the genuine receipt.

329. *Italian Snuff.*

PUT into a mortar, or other convenient vessel, a quantity of Snuff already scented with some Flower, pour thereon a little White Wine, and add, if agreeable, some Essence of Ambergrease, Musk, or any

other Perfume you like best ; stir the Snuff and rub it well between your hands. Scent snuff in this manner with any particular flavour, and put the different scented Snuffs in separate boxes, which are to be marked, to prevent mistakes.

330. *Snuff scented after the Spanish Manner.*

TAKE a lump of double refined Sugar, rub it in a mortar with twenty grains of Musk, add by little and little a pound of Snuff, and grind the whole with ten grains of Civet, and afterwards rub it well between your hands.

Seville Snuff is scented with twenty grains of Vanilloes only. Keep your Snuff in canisters closely stopped, to prevent the scent from exhaling.

As Spanish Snuff is very fine and of a reddish colour, to imitate it nicely, take the best Dutch Snuff, well cleansed, granulated, and coloured red ; beat it fine,

I

and

and sift it through a very fine lawn sieve. After it has been cleansed according to the foregoing directions, it is fit to take any scent whatever.

There is no risk in using a sieve that retains the scent of any Flower, to perfume your Snuff with the flavour of Musk, Ambergrease, or any other Perfume; on the contrary, the Snuff receives the Perfume the more readily, and preserves its flavour the longer on that account.

331. *Method of dying Snuff Red or Yellow.*

TAKE the size of a nut or two of Yellow or Red Ochre, and to temper the colour mix therewith a little White Chalk. Grind these colours with a little less than half an ounce of Oil of Sweet Almonds on a marble, and moisten with as much Water as the colour will take up, till it becomes a smooth Paste; then mix it with  
a thin

a thin Mucilage of Gum Tragacanth to a proper consistence, and put it into an earthen dish, and stir into it about a pint more Water. Then take any quantity of cleansed Snuff you please, throw it into the colour, and rub it well between your hands; and when the Paste is thoroughly tinged with the colour, leave it till next morning to settle, then spread it thin on a cloth to dry, and place it in the sun, stirring it about every now and then that it may dry equally. When dry, gum it with a very thin Mucilage of Gum Tragacanth made with some sweet-scented Water. To gum the Snuff as equally as possible, wet your hands with this Gum Water, and rub the Snuff well between the palms of your hands. Afterwards dry the Snuff in the sun, and when it is very dry, sift the colour that does not adhere to the Snuff through a very fine sieve, and then the Snuff is properly prepared to receive any flavour you chuse.

332. *Herb Snuff.*

TAKE Sweet Marjoram, Marum Syriacum Leaves, and Lavender Flowers dried, of each half an ounce, Asarabacca Leaves a drachm. Rub them all into a powder.

333. *Or,*

TAKE of Betony Leaves and Marjoram, of each half an ounce, Asarabacca Leaves a drachm. Beat them together into a powder.

334. *Or,*

TAKE Marjoram, Rosemary Flowers, Betony, and Flowers of Lillies of the Valley, of each a quarter of an ounce, Nutmegs a drachm and an half, Sal Volatile forty drops. Powder, and keep in a phial close stopped.

335. Or,

TAKE Flowers of Lavender, and Clove-ly-flowers, of each a quarter of an ounce, Lillies of the Valley, Tiel-tree Flowers, Flowers of Sage, Betony, Rosemary, and Tops of Marjoram, of each half a drachm, Cinnamon, Aloes-wood, Yellow Sanders, and White Hellebore-root, of each a drachm; Oil of Nutmegs and Oil of Lemons, of each three drops: Mix into powder.

A pinch or two of any of these Snuffs may be taken night and morning medicinally, or at any time for pleasure. They are externally serviceable for weak eyes and all disorders of the organs of sight and hearing, and also relieve head-aches, giddiness, palsies, lethargies, and many other complaints, and are, though agreeable and simple, far superior to what is sold under the name of Herb Snuff.

F I N I S.
